STATISTICAL REPORTS

Uniform Crime Reporting and the National Incident Based Reporting System

Uniform Crime Reporting (UCR) has been the national crime-reporting standard since 1930. However, it is now being replaced by the National Incident Based Reporting System (NIBRS).

NIBRS expands the 7 traditional Part I Offenses into 22 Group A Crimes, on which detailed information is reported. It includes revised and new offense definitions, provides for greater specificity in reporting, tracks explicit and implicit correlations between offenses, property, victims, offenders and arrestees, and places special emphasis on drug offenses as well as accounting for computer crime.

Our report booklet includes information from both methods, to encourage valid comparisons. The first section includes the UCR reports, the traditional statistical gatherings with which we are familiar, followed by the NIBRS reports. UCR is a hierarchical system, in which only the most serious crime occurring during an incident is counted. NIBRS counts all crimes that occur in an incident. Under UCR, the "Forcible Rape" category tallies the unlawful carnal knowledge of female victims by male perpetrators; under NIBRS the category is retitled "Sex Offenses, Forcible" and expanded to include all forced sexual acts, including fondling, regardless of the sex of individuals involved.

Dynamic Files

All files utilized in the creation of these reports are d*ynamic files.* Dynamic files allow additions, deletions and/or modifications of records at any time, resulting in more complete and accurate records in the databases. The reports included in this booklet represent a "snapshot" of the statistical databases with the information contained therein at the time the report was compiled and printed.

Due to the ability to alter the databases after reports are compiled, quarterly totals may change from quarter to quarter and may not add up to annual totals. By utilizing the most current quarterly report booklet and the year to date figures included in it, one may be assured of obtaining the most complete statistical information.
