Stakeholder Action Committee - SAC

The Stakeholder Action Committee (SAC) met 6 times during the Planning process. Twenty-six representatives from 26 organizations/HOAs were invited to participate in March and April 2023; 15 representatives from 11 organizations/HOAs chose to participate. The committed SAC members informed the process, content and public presentations with their knowledge and commitment to this community open space. They also informed, invited and engaged their members / constituents in the planning process.

This appendix outlines the SAC role and responsibilities as well as the SAC meeting schedule – some dates changed as the project progressed. It also contains the meeting schedule for the Agency Partners.

Stakeholder Groups – Additional Data

Blodgett Open Space Master and Management Plan

SAC #1- Stakeholder Action Committee

11 April 2023

The Stakeholder Action Committee will provide input and support to Colorado Springs Parks, Recreation and Cultural Services staff regarding the Blodgett Open Space Master and Management Plan planning process and recommendation development.

- Membership will consist of the following entities:
 - Chairperson: David Deitemeyer, Project
 O Us Hang Gliding and Paragliding Assoc. Manager, Colorado Springs Park. Recreation and Cultural Services
 - Blodgett Open Space Ranger
 - Parks Community Engagement Specialist
 - Trails and Open Space Coalition
 - Medicine Wheel Trail Advocates
 - Colorado Springs Mountain Bike
 - Association (COSMBA) American Trail Running Association
 - Hiking Advocate

- Audubon Society
- Equestrian Representative
 Independence Center
- Hike it Baby
- o CONO
- Catamount Institute
- Generation Wild
- Friends of Peregrine Parks and Open Spaces
- Adjacent HOA representatives,
- o Others, as determined by Parks.

Rules:

- Colorado Springs Parks Recreation and Cultural Services (CSPRCS) is fully responsible for the planning and management of Blodgett Open Space. Consequently, CSPRCS has the authority to accept or override the SAC's advice to ensure compliance with their requirements.
- The SAC will work closely with the CSPRCS Project Manager, each other, and the TAPIS consultant team by doing research, representing their constituents and shaping the plan public process.
- The SAC will remain in place until the Blodgett Open Space Master and Management Plan is published.
- Members will choose their alternates and will provide replacements if individuals are unable to fulfill their obligations.
- The SAC meeting time will be between 1:30-3:00 on Tuesdays at Colorado Springs Station 18, 6830 Hadler View, Colorado Springs, CO 80919 (see schedule below). The City will call additional meetings as needed.
- Notes of meeting identifying Action Items both action completed, and actions required by whom and when - will be documented, distributed to members.
- Since this is primarily a working group, the meetings will not be considered public. However, members can recommend that others be invited to meetings as needed.

11 April 2023 Page 1 of 4

Role and Responsibilities of the Stakeholder Action Committee

Appendix A Stakeholder Groups – Additional Data

Stakeholder Groups – Additional Data

Responsibilities (not inclusive):

- · Contribute work as well as advice (roll up sleeves).
- · Members or alternate will attend all meetings unless excused by the Chair.
- Keep your immediate constituency (department or organization) informed, distribute project information and meeting announcements and seek input as needed.
- Ensure that this plan is well integrated with other recently completed and ongoing planning efforts.
- The Chairperson and consultant team will develop meeting agendas, related meeting information, distribution of meeting notices and general committee management.
- · Serve as advocates for the planning process and next steps upon completion of process.
- · Attend and assist with public events and meetings.
- Receive/Review/and Discuss results of all technical analysis and community response.
- Additional responsibilities as they emerge.

Guiding Principles:

- Have fun! This is an opportunity to shape the future of an important part of Blodgett Open Space.
- Every contribution has merit. Listen to each other, respect each other's opinions, and seek the "why" behind what someone is saying. Listen to learn.
- 3. Fully participate. It is important to get everyone's input.
- 4. Bring up new ideas but try not to dwell on a topic.
- 5. Participate constructively and professionally. Bring issues and concerns to the SAC.
- Side conversations and offline dialogue is not appropriate and not consistent with an open meeting approach.
- 7. Represent your agency and constitutes.
- 8. Take initiative but keep others informed.
- The SAC will attempt to reach agreement through consensus, using a vote if consensus cannot be reached.

Milestones:

March - April 2023: Invitation and agreement to participate in Stakeholder Action Committee.

11 April 2023: First SAC meeting

The preferred time will be between 1:30-3:00pm on Tuesdays at Colorado Springs Station 18.

The meeting will be designed to accomplish the following:

- Share and confirm project scope, study area, public process approach, schedule, and the role and purpose of the SAC;
- · Discuss project contributions from SAC participants; and Agency Partners;
- Review and confirm non-negotiable "givens;"
- · Review and discuss Opportunity Themes:
- · Discuss and amend Planning Topics: Concerns to be addressed in the Plan;
- Confirm the agenda for the full set of SAC meetings;
- · Confirm SAC participants and focused stakeholder lists; and
- Review presentation strategy for PopUps, website, online Survey, Community Activity #1.

Stakeholder Groups – Additional Data

Agency Partners

The Agency Partners provided a focused venue for adjacent and overlapping land managers to discuss the City's Blodgett Master Plan and possible future collaborative opportunities to better serve the Colorado Springs community. The group include representatives from

- USFS Pike and San Isabel National Forest;
- Colorado Parks and Wildlife;
- Colorado Springs Utilities; and
- United States Air Force Academy / US Fish and Wildlife Service.

The Agency Partners met at the Park Recreation and Cultural Services office on 15 May 2023, 07 August 2023, 08 September 2023, 11 October 2023 and by phone in November.

Appendix B A Brief History of the Property

Appendix B

A Brief History of the Property

A Brief History of the Property Historical Context

The modern history of Blodgett Open Space largely parallels the history of the surrounding natural and human communities. From the earliest human habitation to modern times, Blodgett Open Space's year-round flowing water, topography and vegetation have provided humans with abundant wildlife, diverse and fruitful plants, and recreational opportunities.

Blodgett Open Space is assembled from multiple properties--the original portion of the park was purchased by the City in 2001. Over the decades, additional parcels have been acquired through the City's Trails Open Space and Parks (TOPS) program growing it to 384+ acres. To cohesively guide development and management, the adjacent portions of the Peregrine and Oak Valley open spaces are included in this Master and Management Plan. Together these properties preserve mountain viewshed, plant and animal habitat, geological and cultural history, and recreational opportunities for the community.

Early and Indigenous Community Habitation

Blodgett Open Space lies along the Colorado Front Range Foothills Transition Zone. Archaeological investigations in the Denver area reveal that the foothills transition zone presented an advantageous situation for prehistoric use and is known to have had prehistoric occupations extending from the Early Archaic period. Although Paleo Indian sites are known in Colorado, on the Plains as well as in the intermountain area, no Paleo Indian sites have been well documented in the area (Halasi 1980). The Ute Indians were the first explorers, settlers, and inhabitants of the Pikes Peak Region (Mehls 1984; Chaussee 2006). Pikes Peak is traditionally known as Tava or "sun" in the Ute language and the community surrounding the mountain was known as the Tabeguache, "People of the Sun Mountain" before they were relocated to the western slope of Colorado in 1868. Once moved to the western slope, the Tabeguache were known as the Uncompanyer. Under the Ute Agreement of 1880, the Tabeguache were removed from Colorado

altogether, relocated to a reservation in Utah (Kaelin and Pikes Peak Historical Society 2008).

Photo from Pioneers Museum collections

Historic Settlement

Although European exploration and historic settlement of the region began in the 1600s, it was the Colorado Gold Rush beginning in 1858 that brought large numbers of people to the then Kansas Territory (Clark 1999). While the Pikes Peak area pulled in \$18 million in gold (Monahan 2002), profitable claims were few and far between and by 1860, the Colorado Gold Rush was all but extinguished. The deflation of the boom left many miners abandoned in the new Colorado Territory in 1861. While it was the gold rush that brought settlers to Colorado, it was the Homestead Act of 1862 that kept them here.

The first settlements in the 1860s included open range cattle ranches and the estate of General Palmer at Glen Eyrie. Land in the immediate vicinity was first acquired for settlement in the 1870s. Eight patents totaling about 1,166 acres were acquired from the federal government between 1875 and 1918 (Alpine 2023). From 1913 Golden Cycle Corporation held most of the land from Pikeview to Woodmen Valley. Mining tunnels ran north and west from the shaft at Pikeview through most of the area south of Woodmen Road (Halasi 1980).

Blodgett Open Space derives its name from Blodgett Peak, which was once part of the ranch owned by the Blodgett family dating back to the mid to late 1800s. Among the first settlers in the area, the family drove cattle and helped start a large ranching community. The Blodgett family is now the Air Force Academy.

Recent Development

Development of the Popes Bluffs and Woodmen Valley area followed a pattern typical of other areas in the Pikes Peak Region. The Modern Woodmen of America established a tuberculosis sanatorium in Woodmen Valley in 1909 that became a major health center by the 1920's. The Modern Woodmen Sanatorium used the property for water collection and diversion. Many of the old access roads connect to cisterns that are located on and above the open space. As a turn of the century institution, it is likely the Sanatorium made every effort to be self-sufficient. Collecting its own water would have decreased reliance on outside sources. With the rise of new medical treatment of tuberculosis, the sanatorium was abandoned in 1947.

The next owner willed this sanatorium to the Sisters of St. Francis Seraph in 1954. With the growth of Colorado Springs and the establishment of the Air Force Academy north of Woodmen Valley, the area

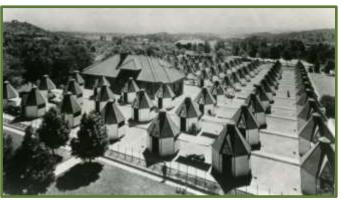

Photo from Pioneers Museum - Woodmen Sanitorium

became valuable for suburban development (Halasi 1980). In 1958, the North American Aerospace Defense Command (NORAD) conducted surveys in the area for potential locations for it's Combat Operations Center, which was ultimately constructed under Cheyenne Mountain (Alpine 2023).

Appendix B

A Brief History of the Property

The 1997 Colorado Springs Open Space Plan targeted Blodgett Open Space as a candidate area for conservation because of its location in the foothills, diverse plant communities, valuable wildlife habitat and critical position to preserve the natural character along the front range backdrop. The USFS supported the City's original purchase and the subsequent 2002 master planning process. The 2012 Waldo Canyon Fire impacted much of the USFS lands west of as well as portions of the open space; these areas are showing signs of vegetative regeneration. In the years following, the City has undertaken forest health efforts to enhance wildfire resilience on the original property. Wildfire resilience remains a priority on the additional open space properties.

Most recently, information and wayfinding signage was installed in the northern portion of the open space to enhance user experience and understanding of the public open space.

Partial Source: 2002 Blodgett Open Space Master Plan and the 2015 Ute Valey Park Master and Management Plan

Conservation Easement, Easements and Right of Way Information

- The City of Colorado Springs owns the water and mineral rights on the property./// Parks to verify
- El Paso County hold a conservation easement on the 64-acre "South Blodgett" parcel.
- Colorado Springs Utilities owns a fee simple water line easement ///on the far northeast corner of the property and the parcel containing the water tank. An access road to the water tank on the northern portion of the property is held via an interdepartmental Memorandum of Understand (MOU). In addition, Colorado Springs Utilities owns electrical easements and service lines to the telecommunications barn and the Pikeview Quarry.
- TeleComs, a telecommunications company, owns a use and access road easement directly west of the Orchard Valley Trailhead. This easement was in place when the City purchased the property.
- The City supports reclamation of the Pikeview Quarry. City property includes previous disturbance from required stormwater management facilities from the Pikeview Quarry operations included within the DRMS permit area. Portions of the property are subject to approved, agreed-upon and permitted reclamation requirements by Riverbend Industries. This impact is immediately adjacent to the quarry site and accounts for approximately 31-acres of the open space.

Easement documents and other agreements mentioned above can be found in Appendix D.///

Appendix C Existing Conditions and Site Assessment

Existing Conditions and Site Assessment

Existing Conditions and Site Assessment

This planning process was initiated with an analysis of existing resource conditions within and adjacent to Blodgett Open Space. The purpose of this analysis was to identify high-value or sensitive resources, understand the condition of biological, cultural, and infrastructure resources, and to identify management and stewardship priorities. This information establishes a baseline for the planning process from which infrastructure development and resource management concepts were built. While the property boundary, habitats, and resources are inextricably linked to US Forest Service land, this assessment focuses on the city-owned open space property.

The data assembled for the Blodgett Open Space parcels in the 2002 master planning process was reassessed and extended to additional properties acquired thru the Trails Open Space and Parks (TOPS) program (384 acres), Peregrine 2 Open Space (5.07 acres), and Oak Valley Ranch Open Space (9.97 acres). This plan encompasses a 700-acre planning area. See the text box in the Master Plan Introduction page 3 for the history of land acquisitions.

Methodology

The existing conditions inventory is broadly grouped into three categories: Physical Resources, Biological and Cultural Resources, and Management and Social Influences. Physical resources include topography, geology, soils, and hydrology. Biological and cultural resources include vegetation communities, wildlife habitat, and cultural resources. Management and social resources include ordinance, deed and policy restrictions, and existing infrastructure.

Information on physical and biological resources was initially compiled from publicly available sources, including maps and data from Colorado Parks and Wildlife, Colorado Natural Heritage Program, U.S. Geological Survey, Natural Resource Conservation Service, and the City of Colorado Springs. Natural resource surveys of the property were conducted by ERO Resources ecologists in May 2023, to evaluate and document vegetation communities, site-specific wildlife habitat and observations, and potential resource management issues. Cultural resource information was provided by the City, based on field surveys conducted by contracted archaeologists. Forest and fire mitigation information was provided by the City Forester and City Fire Department.

A GIS analysis of habitat fragmentation and habitat integrity was conducted based on social trail mapping provided by the City and supplemented with the Strava heat map data, with a spatial analysis based on scientific literature pertaining to the impacts of trails, recreation, and human disturbance on wildlife habitat. Illegal trails on USFS lands are not shown on the mapping per the request of the USFS.

[Reference: https://medium.com/strava-engineering/the-global-heatmap-now-6x-hotter-23fc01d301de]

Throughout plan development, the natural and cultural resources were evaluated by the consultant team and reviewed by the Department staff. Each resource was evaluated individually since their inherent information was considered separately by the decision-makers and the public . For example, high value habitat resources were considered under different decision processes than property use restrictions which are mandated by funding sources. The master plan delineates preservation areas that would be sensitive to or be negatively impacted by human activity.

Existing Conditions and Site Assessment

Physical Resources

Location and Topography

Blodgett Open Space forms the interface between developed neighborhoods and the mountain front in northwest Colorado Springs. The property is bounded by city streets or private residences to the east, Pike National Forest to the north and west, and the private Pikeview Quarry to the southwest.

The open space property is characterized by a series of multiple ridgelines and gullies, trending downward from the higher-elevation forests to the west. From east to west, the topography of the land rises steadily for about 500 vertical feet to an inflection point within the USFS land, where it then more steeply climbs towards the ridgeline. Elevations on the property range from about 6,800 feet in the southeast corner to about 8,200 feet at the northwest corner. With over 1,400 feet of elevation gain in a relatively short distance (less than 1.5 miles), the topography of the property has a significant influence on vegetation communities, wildlife habitat, and opportunities for trail connectivity.

Geology and Soils

Subsurface geology consists of shale-dominated formations in the lower areas to the east, transitioning to Cretaceous sandstone at mid-elevations and the Pikes Peak granite that dominates the Rampart Range and surrounding foothills (SWReGAP 2023). Soils throughout the BOS study area is dominated mostly by the Jarre-Tecolote complex (8 to 65 percent slopes) and Tecolote very gravelly sandy loam (15 to 40 percent slopes). These well drained soils consist of a mixture of gravelly sandy loams and clays, and cobbly sandy clay loam (NRCS 2019).

Aspect

The ridgelines and gullies throughout the open space create its constantly changing aspect; which is defined as the principal direction the land faces. These ridgelines are generally south-facing on one side and north-facing on the other, with some open faces facing to the east. Aspect directly affects vegetation communities, with north-facing slopes containing cool conifer forest while south-facing slopes are dominated by shrublands and open terrain. Likewise, aspect also affects recreational use and experiences, where trails on north faces are more comfortable in the heat of the summer but may hold snow and ice in the winter, while south-facing slopes can be hot in the summer but are utilized year-round.

Hydrology

Three principal drainages cross the property draining from west to east. To the north, Dry Creek runs through the north northernmost portion of the property, while a smaller unnamed drainage flows through the property toward the north trailhead. These northern drainages converge to the east of Woodmen Road and flow toward Monument Creek. A third, smaller unnamed drainage emerges from the base of the Pikeview Quarry near the southernmost extent of the open space. These three intermittent drainages generally have some flow of water most of the year. Many additional dry gullies are found on the property, all trending in a west-east orientation.

Biological and Cultural Resources

Vegetation Communities

Vegetation communities in Blodgett Open Space are dominated by mixed shrubland and woodland communities, with a limited area of urban development. Dominant vegetation communities are described as follows:

Mixed Conifer

Typically dominated by an overstory of Ponderosa pine (Pinus ponderosa), Douglas fir (Pseudotsuga menziesii), and Rocky mountain juniper (Juniperus scopulorum) with lower occurrences of Engleman spruce (Picea pungens). The understory is comprised of species including snowberry (Symphoicarpos spp.), Arizona fescue (Festuca arizonica), blue grama (Bouteloua gracilis), prairie sagewort, and yarrow (Achillea millefolium). Although not considered a noxious weed, a less desirable species, white fir (Abies concolor), was observed in this community. However it was not a dominant species as only a few specimens were noted. The mixed conifer forest provides important habitat for wildlife including significant nesting substrate for raptors as well as provide cover and forage for some larger mammal species such as deer and elk during calving season.

Mixed Conifer-Scrub/Shrub

Typically dominated by an overstory of Ponderosa pine, Douglas fir, Rocky Mountain juniper, Pinyon pine (Pinus edulis), Gambel oak (Quercus gambelii), mountain mahogany (Cercocarpus montanus), and chokecherry (Prunus spp.). The understory is comprised of species including crested wheatgrass (Agropyron cristatum), prairie sagewort (Artemisia frigida), blue grama (Bouteloua gracilis), smooth brome (Bromus inermis), pussytoes (Antennaria species), Scarlet gilia (Ipomopsis aggregate), and pasqueflower (Pulsatilla patens). Noxious weed species observed include diffuse knapweed and common mullein. This vegetation community provides important habitat for wildlife including significant nesting substrate for raptors as well as provide cover and forage for some larger mammal species.

Scrub/Shrub

Dominated by mixed shrub community comprised of Rocky Mountain juniper, Gambel oak, mountain mahogany, rubber rabbitbrush, chokecherry, skunkbush sumac, and yucca. The understory is comprised of species such as crested wheatgrass, prickly white poppy (Argemone albiflora), smooth brome, curlycup gumweed (Grindelia squarrosa), prickly pear, kochia, prairie sagewort, and Nuttall's violet (Viola nuttalii). Noxious weed species observed include musk thistle, diffuse knapweed, poison hemlock (Conium maculatum), redstem filaree, Scotch thistle (Onopordum acanthium), and common mullein. Denser shrub thickets provide important cover, forage, and nesting substrate for songbirds. This community also provides cover and forage for some mammal species.

Mixed Grassland

Mixed grassland is dominated by herbaceous species such as crested wheatgrass, sand dropseed, smooth brome, cheatgrass, and blue grama. Noxious weed species observed include diffuse knapweed and redstem filaree. This community undergoes routine disturbance from mowing and recreational activities. It may still provide potential foraging and nesting habitat for birds and small mammals, especially those habituated to human activity.

Riparian

Riparian communities are found along the principal drainages and are dominated by a mix of woody and herbaceous species. Species observed include lanceleaf cottonwood, Gambel oak, skunkbush sumac, rubber rabbitbrush, narrowleaf

Existing Conditions and Site Assessment

willow (Salix exigua), crack willow (Salix fragilis), narrowleaf cattail (Typha angustifolia), broom snakeweed (Gutierrezia sarothrae), sand dropseed, crested wheatgrass, cheatgrass, smooth brome, and prairie sagewort. Noxious weed species observed include diffuse knapweed, Russian olive, musk thistle, redstem filaree, and common mullein. This community provides important habitat for wildlife including significant nesting substrate for raptors as well as providing cover and forage for smaller and larger mammal species.

Disturbed/Developed

Portions of this community are unvegetated, such as roads, sidewalks, and the gravel mine. The vegetation present is dominated by a mix of woody and herbaceous vegetation including pinyon pine (Pinus edulis), lanceleaf cottonwood (Populus x accuminata), Gambel oak (Quercus gambelii), rubber rabbitbrush (Ericameria nauseosa), chokecherry (Prunus virginiana), skunkbush sumac (Rhus trilobata), snowberry (Symphoricarpos occidentalis), Woods' rose (Rosa woodsii), yucca (Yucca species [sp.]), crested wheatgrass (Agropyron cristatum), prairie sagewort (Artemisia frigida), kochia (Bassia scoparia), prickly pear (Opuntia sp.), scarlet globemallow (Sphaeralcea coccinea), sand dropseed (Sporobolus cryptandrus), and common dandelion (Taraxacum officinale). Noxious weeds in this community included Russian olive (Elaeagnus angustifolia), cheatgrass (Bromus tectorum), musk thistle (Carduus nutans), diffuse knapweed (Centaurea diffusa), redstem filaree (Erodium cicutarium), dalmatian toadflax (Linaria dalmatica), and common mullein (Verbascum thapsus). Although this community is more disturbed due to human activity, it still provides potential foraging and nesting habitat for birds and small mammals, especially those habituated to human activity.

Noxious Weeds

As mentioned above, several noxious weeds were observed in the open space. The Colorado Noxious Weed Act classifies noxious weeds into three list: List A species are mandated for eradication, List B species are targeted for management efforts to stop their continued spread, and List C species should be managed by effective weed management approaches based on local government priorities.

Based on previous assessments and observations during 2023 site visit, nine noxious weed species are known to occur within the Blodgett Open Space study area. Five of these species are considered to be management concerns because they are B-listed species. There is one List A species in the study area.

List A Weed Species

Myrtle spurge

List B Weed Species

- Diffuse knapweed
- Musk thistle
- Russian olive
- Dalmatian toadflax
- Scotch thistle

List C Weed Species

- Cheatgrass
- Redstem filaree
- Poison hemlock
- Common mullein

High-quality Habitat and Degradation Threats

High-quality habitat is most likely to be located away from areas of the open space frequented user and away from trails. This habitat could occur in the mixed conifer-scrub/shrub or in the scrub/shrub communities, wherever large, contiguous tracts of habitat with minimal-to-no disturbance present. High-quality habitat provides opportunities for forage and cover for a wide range of mammals and birds, especially large mammals. Noxious weed occurrences were most prevalent along the designated trails and undesignated social trails may allow their introduction into high-quality habitat areas. The introduction of noxious weeds can quickly degrade high-quality habitat.

Forest and Shrubland Conditions

Gambel Oak

The Gambel oak-dominated portions of the scrub/shrub community within Blodgett has many stems per acre (approximately 700 to 1200). The oak has varying amounts of die off from abiotic (fire, wind events, late spring snows, spring frosts, and drought) and biotic (flatheaded wood borers, oak leafroller, anthracnose) factors, which constitutes a wildfire threat. The structure of scrub oak zone varies widely. Large, mature clumps have been deteriorating due to biotic and abiotic factors. The soil parent material, mainly granite, has created continued slow growth and minimal resource availability.

Ponderosa Pine / Gambel Oak

The ponderosa pine/Gambel oak elements of the mixed conifer-Scrub/shrub community is remnant from low severity, frequent fire. Groups and clumps were perpetuated under this fire regime to create a historic canopy of ponderosa pine. However, due to lack of fire return intervals, Douglas-fir, white fir, and contiguous Gambel oak have moved into the stands. Pockets of dwarf mistletoe with varying severities have become present in recent years. Little regeneration of ponderosa pine has occurred due to lack of disturbance to the mineral layer of the soil. This vegetation type is slowly converting to a more scrub oak type as lack of ponderosa pine regeneration continues to perpetuate.

Douglas Fir / White Fir

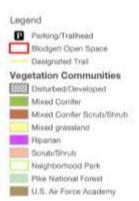

Within the mixed conifer community, the Douglas and white fir dominated stands are typified by an overstocked Douglas-fir overstory with varying structures. The structure is highly dependent on previous treatments in the Blodgett area. Areas with previous entries have a somewhat contiguous overstory but are lacking a midstory and understory due to previous treatments. Small amounts of conifers have grown, yet due to lack of overstory closure this is minimal. Dwarf mistletoe has perpetuated in the stand resulting in highly infested pockets. Endemic levels of Douglas-fir beetle are present in the stand. Remnant and often choked / stressed ponderosa pine can be found at lower levels in these stands. In some areas, Gambel oak is encroaching into the stands.

Vegetation

Information on the magnetization for the participant of the control and one administration

Existing Conditions and Site Assessment

Wildlife and Habitat

Blodgett Open Space provides habitat to a variety of wildlife species that are typical of the urban-forest transitional zone. Common mammals include mule deer, black bear, coyote, red fox, ground squirrel, cottontail rabbit, and others. Common bird species include red-tailed hawk, wild turkey, great horned owl, and various woodpeckers and many bird species (37 species were observed in the 2023 site visit). Reptiles include bull snake, prairie rattlesnake, garter snake, and various lizards. Amphibians are uncommon, but may be found in the riparian and wetland habitats within the open space.

Sensitive Wildlife Habitat

The property contains potentially suitable habitat for the federally threatened Mexican spotted owl, described below. In addition, portions of the open space provide habitat for bighorn sheep, which is a sensitive species of interest in the region. Habitat for both species are provided in greater detail below.

Mexican Spotted Owl

ERO assessed the project area for federally listed threatened the Mexican Spotted Owl (MSO) habitat during the 2023 site visit. The northwest portion of Blodgett Open Space contains designated critical habitat for MSO (U.S. Fish and Wildlife Service 2004). Forests dominated or co-dominated by ponderosa pine, Douglas fir, and white fir are present at the site. The Waldo Canyon Fire in 2012 burned within designated critical habitat for MSO fragmenting forested habitat within Blodgett Open Space and the adjacent Pike-San Isabel National Forest (Maranghides et al. 2015). High-intensity wildfire has strong negative effects on MSO habitat by greatly reducing forest structure and canopy cover utilized by nesting MSO (Ganey et al. 2017; Durboraw et al. 2022). Nearby designated critical habitat has been impacted by other high-severity wildfires in Colorado. Natural-caused forest fires are projected to increase with the effects of climate change (Heidari et. al. 2021).

Great horned owls (Bubo virginianus) have been observed in areas that could provide potential MSO habitat within the project area. Although home ranges for great horned owls and MSO can overlap, their habitat-use is partitioned with great horned owls occupying forests with lower canopy cover (<40%) than MSO (\geq 60%) (Ganey et al. 1997). MSO nests are primarily found in mature forest patches greater than 230 ha (Peery, Gutierrez, and Seamans 1999; U.S. Fish and Wildlife Service 2012). Large, contiguous patches of mature forest do not occur within or adjacent to the project area.

Based on the lack of large, contiguous habitat patches and the presence of great horned owls in the vicinity, Blodgett Open Space is not likely to support MSO breeding habitat. However, owls may disperse through the project area and could become established in the future as the forest matures.

Bighorn Sheep

Blodgett Open Space supports habitat for the Rocky Mountain bighorn sheep (Ovis Canadensis), which is a species of special concern and a Tier 2 priority species for CPW. The open space property is considered to be winter range habitat for the sheep, provides a conservation buffer to the production (i.e., lambing) habitats to the northwest (Blodgett Peak) and southwest (Queens Canyon), and buffers a key movement corridor along the upper ridgeline above the open space. This bighorn herd is closely tracked by CPW and is a source population for reintroduction efforts elsewhere in the state.

Existing Conditions and Site Assessment

Habitat Integrity

In any natural landscape, the development of roads and trails fragments habitat values by disrupting ecological processes and contiguity, increasing erosion and vegetation loss, and introducing linear edges and corridors that become pathways for predators and nonnative species. Habitat fragmentation reduces the size and overall integrity of habitat areas and is detrimental to many species (Noss and Cooperrider 1994; Groves et al. 2002; Decker 2018). Roads and trails, and the human access and use that they support, exacerbate these impacts by creating a "zone of influence" within which human disturbance may alter wildlife behavior and reduce the value of habitat to some wildlife. The impacts of fragmentation vary by species and individual animal and can range from no effect, to interruption of activity, to flight, to abandonment of breeding or foraging sites. This zone of influence can range from 30 to 400 meters or more, depending on terrain, vegetation, species, and levels of human use and prior habituation (Miller et al. 2001; Taylor and Knight 2003; Stankowich 2008; Cassirer et al. 1992; George and Crooks 2006; Naylor et al. 2009; Malone and Emerick 2003; Miller et al. 2020; CPW 2021b).

Habitat Disturbance Analysis

Considering the broad range of impact distances, the existing conditions and context of the property, and other factors, the following analysis of existing and future habitat fragmentation uses a range of 100 to 400 meters as the zone of influence, or impact buffer, of existing and proposed roads and trails. This range recognizes that the impacts of human disturbance are not fixed but occur along a gradient. Areas closer to the disturbance are more likely to be impacted, while areas more distant may not be affected as severely or as often. Analysis definitions are described below.

Habitat Fragmentation Analysis Definitions

- 1. High Disturbance Areas Frequent or permanent human occupation; each of the following with a 100-meter impact zone:
 - a. Existing homes, urban streets, major roads, and highways
 - b. Provides limited habitat value for wildlife, with local exceptions
- 2. Medium Disturbance Areas Frequent but not permanent human occupation:
 - a. Existing system trails, secondary roads, and recreation facilities (100-meter impact zone)
 - b. Social trails (50-meter impact zone)
 - c. Provides degraded habitat for wildlife that are accustomed to human disturbance
- 3. Secondary Habitat Infrequent human occupation, or expanded influence from high or medium disturbances:
 - a. Greater than 100 meters from system trails or 50 meters from social trails
 - b. Provides intact habitat for most wildlife, but human activity may impact wildlife behavior and use, depending on the species and context
- 4. Core Habitat No human development and minimal human presence:
 - a. Greater than 400 meters from development, and 100 meters from social trails
 - b. Provides secure, undisturbed habitat for any species where sufficient habitat otherwise exists

The habitat disturbance analysis for the property is shown on page C-15.

Existing Conditions and Site Assessment

Key Habitat Areas

Blodgett Open Space contains several key habitat types that are that are important for wildlife. These include:

- Riparian habitat Riparian corridors along the three principal drainages support sensitive vegetation communities that are important for many wildlife species in an otherwise arid environment.
- Mixed conifer forest The mixed conifer forest communities along the north-facing slopes provide specific habitat for some wildlife species, and serve as a regional island of conifer habitat in the wake of the Waldo Canyon Fire, which burned most of this forest community for several miles to the south.
- Waldo Canyon Fire Burn Area The burn area has transitioned into an early successional shrubland habitat post-fire. This unique habitat type offers improved visibility, habitat trees, perches, and abundant herbaceous vegetation, fostering an environment conducive to the needs of various species.
- Other key habitat types that occur nearby, but off the property to the west includes habitat that supports bighorn sheep production on the rocky slopes around Blodgett Peak, and several patches of unfragmented core habitat on USFS land west of the Open Space.

Protection and enhancement of these habitat types are priorities for the master and management plan recommendations.

Cultural Resources

Blodgett Open Space contains cultural resources associated with the prehistoric and historic contexts of the region, including Native American use, mining exploration, homesteading, and modern settlement of Colorado Springs. In 2023, Alpine Archaeology conducted an archaeological survey of the property. The survey confirmed cultural resource sites associated with development in the early twentieth century. See Appendix B for a history or the property.

Executive Project Summary

Blodgett Open Space Master and Management Plan Project Location Map

Blodgett Open Space, Photo by Bear Sutton

Project Overview

The original Blodgett Open Space land was purchased through the City of Colorado Springs Trails, Open Space and Parks (TOPS) program and funding in March 2001. A second acquisition to the southeast was incorporated in 2018, bringing in a second parking lot and trail access location. Most recently in 2021, additional land was acquired to extend the land further south, with boundaries along the Pikeview Quarry and Allegheny Road.

The Blodgett Open Space Master and Management Plan process is funded by the <u>Trails, Open Space and Parks (TOPS)</u> program. Implementation of a future adopted master and management will occur as funding allows.

Purpose and Need

A master and management plan process is underway to enhance and protect Blodgett Open Space. The 384-acre Blodgett Open Space (Project Study Area ~700AC) is in the foothills of the Front Range and consists of trails and wildlife habitat neighboring the Pikes National Forest. Using community input to be collected through an extensive community engagement process, the final master and management plan will effectively strike a balance between the need to protect and maintain the Open Space's ecologic and natural resource integrity with the need to serve the ever-expanding base of current and future users.

Project Goals and Objectives

- Expand Blodgett Open Space's foothills to mountain experience with opportunities to enjoy diverse ecosystems, multiple watersheds, rejuvenating burn areas, diverse recreational opportunities, access to regional trails, and connections to recreation adventures in the adjacent Pike National Forest.
- Identify problems and develop remedies that will protect the open space and the visitor experience.
- Protect the open space's cultural integrity and restore its natural resources, making it possible to encourage continued enjoyment while sustaining the open space for future generations.
- Create a trail system integrating equitable access for visitors.
- Take an integrated approach to protecting and planning for the future of this open space, as well as the adjacent City designated open space properties. Establish a shared vision with adjacent land managers to consider the larger landscape conditions.
- Provide engagement opportunities fostering a community-wide culture of stewardship and ownership for Blodgett Open Space.

Public Outreach Effort Summary

As part of the process, the project team worked closely with the community and specific user groups to identify and prioritize how to improve, program, and manage this land to best meet the needs of Colorado Springs residents both now and in the future.

Goals and Objectives for the Public Outreach Process:

- Utilizes traditional and innovative technologies and tools that appeal to and engage diverse populations
- ✓ Is open and transparent to all who are interested in Blodgett Open Space, the ecosystem and wildlife preservation, the Chamberlain Trail, the Park-to-Peak Connector, the future bike park, and other regional/neighborhood issues and connections

Outreach team at Get Outdoors Event

- ✓ Is convenient and comfortable for all participants
- Combines and considers both technical analysis and the "lived experiences" of people who care about the open space properties
- ✓ Builds relationships of trust between the City and process participants and among participants themselves
- Develops public judgment by providing factual information as well as multiple opportunities for people to hear directly from each other
- ✓ Is supported by a rigorous community outreach program to promote and document the process

Events / Outreach Efforts to Date

- May 15th State of the Outdoors (Industry Event)
- May 20th Onsite Community Activity #1 at Blodgett Open Space South Trailhead(Public Pop Up Event)
- June 3rd Get Outdoors Event (Public Pop Up Event)
- June 9th Morning Pop Up at UTE and North Blodgett Open Space Trailhead (Public Pop Up Event)

Avenues of Engagement*

- ✓ Project Phone: 719-799-6662
- ✓ Project Email: <u>BlodgettMasterPlan@gmail.com</u>
- Project Website: <u>https://coloradosprings.gov/BlodgettMasterPlan</u>
- ✓ Three In-Person Public Events
- ✓ Three Project Surveys (General, Visual, Geo-based)
- ✓ City Social Media for Promotion of Events and Surveys

*Examples of Collateral Used in these Avenues can be found in the Appendix of this report.

Key Facts about the Engagement as a Whole

- ✓ 761 Directly Engaged Citizens. Total number of community members reached that include 150 people in person and 611 individual responses from the online input opportunities. In person counts are based on the number of total dots on the board divided by the number of votes each person got (three yesses and two noes for a total of five votes per person).
- ✓ Three In-Person Public Events.
- ✓ **Three Project Surveys** (General, Visual, Geo-based)
- Visual Preferences and In Person Input: More people were for the updates and features being considered then they were against them.

\checkmark Visual preferences totals from all in person and online events:

lmage No.	Image Title	Yes Totals (All In Person Events)	No Totals All (In Person Events)	Yes Totals (Online Survey)	No Totals (Online Survey)	All Yes Totals	All No Totals

16	Adaptive Management	22	4	19	14	41	18
	Totals	575	175	1,055	458	1,630	633

The top five YES answers from all in person events and digital surveys were:

- 1. Advanced Single-Use Mountain Biking Trails (189 votes)
- 2. Multi-Use Trails (187 votes)
- 3. Paragliding and Hang-Gliding Launch and Landing Sites (162 votes)
- 4. Advanced Single-Use Hiking Trails (161 votes)
- 5. Habitat Protection (146 votes)

The top five NO answers were:

- 1. Advanced Single-Use Mountain Biking Trails (189 votes)
- 2. Multi-Use Trails (187 votes)
- 3. Paragliding and Hang-Gliding Launch and Landing Sites (162 votes)
- 4. Advanced Single-Use Hiking Trails (161 votes)
- 5. Habitat Protection (146 votes)

> Overview of Engagement Feedback from In Person and Digital Survey Opportunities

We actively sought citywide input for the open space master and management plan during the spring and beginning of summer. The following is a summary of the details relating to the input received regarding each those activities. A full report and backup of all input and data received can be found in the Appendix of this report.

In-Person Events

State of the Outdoors Industry Event

Interactive Voting Boards with Color Coded Stickers for Voting

The State of the Outdoors event is hosted by the Pikes Peak Outdoor Recreation Alliance (PPORA), the event provided the opportunity for the project team to collect input from organizations and industry leaders that value and recognize the region's natural and recreational assets for our community and economy. The team popped up at this event and collected input regarding the visual preferences for the open space. Voters got three green stickers for things they wanted to see and two red stickers for what they did not want to see at Blodgett Open Space.

Summary of Visual Preferences Boards from this Event:

lmage No.	Image Title	Yes Totals (All In Person Events)	No Totals All (In Person Events)
1	Accessible Trails for Other Power-Driven Mobility Devices	6	0
2	Bird and Wildlife Watching	1	0
3	Advanced Single-Use Mountain Biking Trails	2	0
4	Off-Leash Dog Area and On-Leash Trails	1	3
5	Volunteering	2	0
6	Multiuse Trails	8	0
7	Advanced Single-Use Hiking Trails	6	0
8	Chairlift on Adjacent Property to Upper Elevations	7	2
9	Picnic Areas and Shelters	2	1
10	Nature-based Playground	4	1
11	Restrooms	6	0
12	Habitat Protection	6	0
13	Winter Sports Trails	4	0
14	Paragliding and Hang-gliding Launch and Landing Sites	2	3
15	Visitor / Regional Trailhead / Interpretive Center	3	0
16	Adaptive Management	2	0
	Totals	62	10

Key Findings from the votes on the boards:

✓ An estimated 42 people were engaged during this event based on the numbers above,

✓ The top five YES answers were:

- Multiuse Trails (8 votes)
- Chairlift on Adjacent Property to Upper Elevations (7 votes)
- Ties for Third: Restrooms (6 votes), Habitat Protection (6 votes), Accessible Trails for Other Power Driven Mobility Devices (6 votes), Advanced Single-Use Hiking Trails (6 votes)

✓ The top five NO answers were:

- Off-Leash Dog Area and On-Leash Trails & Paragliding and Hang-gliding Launch and Landing Sites (3 votes each)
- Chairlift on Adjacent Property to Upper Elevations (2 votes)
- Picnic Areas and Shelters & Nature-based Playground (1 votes each)

Onsite Community Activity #1 at Blodgett Open Space South Trailhead Public Pop Up Event

Interactive Voting Boards with Color Coded Stickers for Voting

Please note that all comments written on the sticky notes for the boards featured here can be found in the Appendix.

We've numbered each note and that number corresponds to the data analysis referenced in this report and the back up data in the Appendix.

Interactive Boards of Aerial Imagery for Individual Comment (Larger Images and Text from the Sticky Notes can be found in the Appendix)

The in-person event took place at the South Trailhead Parking Lot of the Blodgett Open Space. Residents, user groups, and the public were the primary attendees of the event. A food truck was also present for the four-hour event.

The team had drone aerial images where attendees could write their comments about any area of the open space on a sticky note and place it on the aerial. The team also collected input regarding the visual preferences for the open space (see boards above from event). Voters got three green stickers for things they wanted to see and two red stickers for what they did not want to see at Blodgett Open Space.

Other collateral handed out at the event were project location maps and various fact sheets about the project effort and the open space.

Summary of Visual Preferences Boards from this Event:

lmage No.	Image Title	Yes Totals (All In Person Events)	No Totals All (In Person Events)
1	Accessible Trails for Other Power-Driven Mobility Devices	11	29
2	Bird and Wildlife Watching	8	2
3	Advanced Single-Use Mountain Biking Trails	34	4
4	Off-Leash Dog Area and On-Leash Trails	16	4
5	Volunteering	7	0
6	Multiuse Trails	23	1
7	Advanced Single-Use Hiking Trails	29	0
8	Chairlift on Adjacent Property to Upper Elevations	11	28
9	Picnic Areas and Shelters	4	6
10	Nature-based Playground	5	1
11	Restrooms	9	12
12	Habitat Protection	22	3
13	Winter Sports Trails	20	0
14	14 Paragliding and Hang-gliding Launch and Landing Sites		17
15	15 Visitor / Regional Trailhead / Interpretive Center		6
16	Adaptive Management	10	4
	Totals	222	117

Key Findings from the votes on the boards:

- ✓ An estimated 68 people were engaged during this event based on the numbers above,
- ✓ The top five YES answers were:
 - o Advanced Single-Use Mountain Biking Trails (34 votes)
 - Advanced Single-Use Hiking Trails (29 votes)

- Multiuse Trails (23 votes)
- Habitat Protection (22 votes)
- Winter Sports Trails (20 votes)

✓ The top five NO answers were:

- o Accessible Trails for Other Power-Driven Mobility Devices (29 votes)
- o Chairlift on Adjacent Property to Upper Elevations (28 votes)
- Paragliding and Hang-gliding Launch and Landing Sites (17 votes)
- Restrooms (12 votes)
- Picnic Areas and Shelters & Visitor/Regional Trailhead/Interpretive Center (6 votes each)
- ✓ Some of the most common verbal comments given to the team about certain features being voted on were:
 - Accessible Trails for Other Power-Driven Mobility Devices: Most wanted to clarify that they are not in favor of adjusting trails for power vehicles and understand that affects ADA access. Most wanted to note that they support ADA, but are fearful of what happens when you alter trails to be pavement.
 - o Off-Leash Dog Area and On-Leash Trails: Most yes votes preferred fenced in areas.
 - **Picnic Areas and Shelters:** Most would like picnic areas or places to sit, but worried that shelters and nicer areas bring more traffic and transients to the neighborhood.
 - Restrooms: People prefer the portapotty and not a building for fear of attracting transients or being unsafe for people in them alone. Most moms were in favor of restrooms when doing outdoor activities with children.
 - o Paragliding and Hang-gliding Launch and Landing Sites: Most don't want the traffic it attracts.
 - Visitor / Regional Trailhead / Interpretive Center: Most liked the kiosk signage but not the actual building/center. It takes away from the nature aspect.

Key Findings from the Individual Responses from the Sticky Notes on the boards:

Specific Area Comments from the Horizontal Aerial Board (5 comments total):

- **1.** Red Squirrel Trail (behind Trees and Terrain) Sticky Note Comment: Trails connecting Blodgett North and South
- 2. Just Left of Red Squirrel Trail and just north of Overlook Trail Sticky Note Comment: Better Maintained trails - Move trails to Blodgett Park
- **3. Blodgett Peak Sticky Note Comment:** More trails to summit ridge
- 4. Sticky Note placed North and just left of Blodgett Peak Sticky Note Comment: Add trails from the ends of Wagon Wheel (water crossing) North and East toward the park entrance

5. North of the Fenceline Sticky Note Comment:

Wide regional trail connecting original Blodgett area to new Pike view Frontage (Chamberlain?)

Specific Key Trends from the Vertical Aerial Board (32 comments total):

✓ Parking Issues:

- Concerns about alcohol consumption in the parking lot at night.
- Demands for more parking spaces to meet the current demand.
- Desire to hide parking lots from nearby residents' view.
- Requests for no parking off of neighborhood roads, specifically Coldwater, Front Royal, Vidalia, Natches, Hollandale, and Julynn.
- No parking or parking lot access from Coldwater Dr or Front Royal.

✓ Security and Safety:

- Requests for gates to be closed during darkness and the parking lot to close at dusk.
- Concerns about illegal activities and a desire for enhanced security, including the installation of close circuit TV cameras in the parking lot.

Trail Management:

- Desire to maintain a healthy space between trails and property lines to prevent disturbances to nearby residents.
- Calls for trails that are accessible for Persons with Disabilities (PWD) and blend with the environment using wood instead of concrete. Motorized vehicles, such as dirt bikes and ATVs, should be restricted from these trails.

✓ Nature Preservation:

- Preservation of scrub oak stands for birds and squirrels.
- Coordinate with the U.S. Forest Service (USFS) for more high-elevation trails and access to the top of Blodgett Peak.
- Avoid turning certain areas into traffic zones to maintain the natural environment.

✓ Egress and Emergency Access:

 Suggestions to coordinate with the United States Air Force Academy (USAFA) for emergency egress during wildfires and other emergencies.

✓ Horse-related Requests:

- Desire for horse barns with two horses.
- A mention of horse-related features like "mini incline."

✓ Specific Road Safety Concerns:

 Requests for speed bumps on Allegheny Curve and Allegheny near Front Royal due to high-speed racing and blind spots.

✓ Responsible Pet Ownership:

• Calls for dog poop cans and responsible dog ownership to address the issue of dog waste in the area.

Get Outdoors Public Pop-Up Event

Interactive Voting Boards with Color Coded Stickers for Voting

The team popped up at this event at the City's Leave No Trace activity station to collect input for our new master and management plan. This was a multigenerational, free interactive event where the whole family could explore outdoor activities and connect with local outdoor businesses, groups, nonprofits, clubs, and land managers! The goal of Get Outdoors Day is to connect people to the great outdoor recreation opportunities that are present in the local Pikes Peak Region.

The team also collected input regarding the visual preferences for the open space (see boards above from event). Voters got three green stickers for things they wanted to see and two red stickers for what they did not want to see at Blodgett Open Space.

Other collateral handed out at the event were project location maps and various fact sheets about the project effort and the open space.

Summary of Visual Preferences Boards from this Event:

lmage No.	Image Title	Yes Totals (All In Person	No Totals All (In Person
		Events)	Events)
1	Accessible Trails for Other Power-Driven Mobility Devices	6	0
2	Bird and Wildlife Watching	3	0
3	Advanced Single-Use Mountain Biking Trails	6	0
4	Off-Leash Dog Area and On-Leash Trails	6	2
5	Volunteering	4	1
6	Multiuse Trails	9	0
7	Advanced Single-Use Hiking Trails	7	0
8	Chairlift on Adjacent Property to Upper Elevations	5	5
9	Picnic Areas and Shelters	10	1
10	Nature-based Playground	18	0
11	Restrooms	12	1
12	Habitat Protection	16	0
13	Winter Sports Trails	10	1
14	Paragliding and Hang-gliding Launch and Landing Sites	18	11
15	15 Visitor / Regional Trailhead / Interpretive Center		3
16	Adaptive Management	4	0
	Totals	138	25

Key Findings from the votes on the boards:

✓ An estimated 33 people were engaged during this event based on the numbers above,

✓ The top five YES answers were:

- Tied for First: Nature-based Playground (18 votes), Paragliding and Hang-gliding Launch and Landing Sites (18 votes)
- Habitat Protection (16 votes)
- o Restrooms (12 votes)

✓ The top five NO answers were:

- Paragliding and Hang-gliding Launch and Landing Sites (11 votes)
- Chairlift on Adjacent Properties to Upper Elevations (5 votes)
- Visitor/Regional Trailhead/Interpretative Center (3 votes)

Morning Pop Up at UTE and Blodgett Open Space North Trailheads

Interactive Voting Boards with Color Coded Stickers for Voting

The team popped up in the morning at the UTE and Blodgett Open Space North Trailheads to collect input from users that were present on that day.

The team also collected input regarding the visual preferences for the open space (see boards above from event). Voters got three green stickers for things they wanted to see and two red stickers for what they did not want to see at Blodgett Open Space.

Other collateral handed out at the event were project location maps and various fact sheets about the project effort and the open space.

Summary of Visual Preferences Boards from this Event:

lmage No.	Image Title	Yes Totals (All In Person Events)	No Totals All (In Person Events)
1	Accessible Trails for Other Power-Driven Mobility Devices	14	5
2	Bird and Wildlife Watching	3	0
3	Advanced Single-Use Mountain Biking Trails	15	0
4	Off-Leash Dog Area and On-Leash Trails	13	0
5	Volunteering	7	0
6	Multiuse Trails	14	0
7	Advanced Single-Use Hiking Trails	24	0
8	Chairlift on Adjacent Property to Upper Elevations	2	11

9	Picnic Areas and Shelters	1	2
10	Nature-based Playground	6	0
11	Restrooms	10	0
12	Habitat Protection	20	0
13	Winter Sports Trails	9	0
14	Paragliding and Hang-gliding Launch and Landing Sites	3	5
15	Visitor / Regional Trailhead / Interpretive Center	6	0
16	Adaptive Management	6	0
	Totals	153	23

Key Findings from the votes on the boards:

- ✓ An estimated 35 people were engaged during this event based on the numbers above,
- ✓ The top five YES answers were:
 - Advanced Single-Use Hiking Trails (24 votes)
 - Habitat Protection (20 votes)
 - Advanced Single-Use Mountain Biking Trails (15 votes)
 - o Multiuse Trails and Accessible Trails for other Power-Driven Mobility Devices (14 votes each)
 - o Off-Leash Dog Area and On-Leash Trails (13 votes)

✓ The top five NO answers were:

- Chairlift on Adjacent Property to Upper Elevations (11votes)
- Accessible Trails for Other Power-Driven Mobility Devices and Paragliding and Hang-Gliding Launch and Landing Sites (5 votes each)
- Picnic Areas and Shelters (2 votes)

Online Project Survey Results

The online project surveys asked the community a variety of questions about the Blodgett Open Space in general and also about the updates to the Master and Management Plan that is being developed. Copies of the full surveys, their results, and back up data of responses can be found in the Appendix of this report.

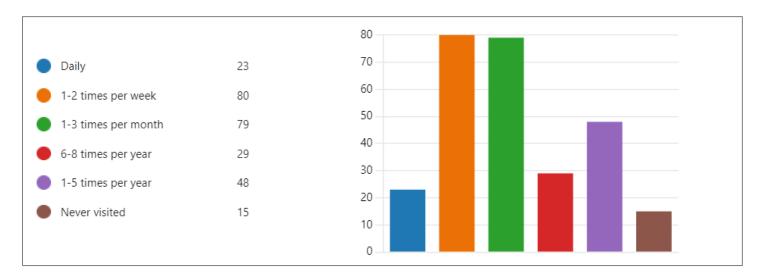

Digital Survey Results by Survey | 611 Total Responses from Three Surveys

1. General Preferences Survey Results

The survey gathered 229 Responses. The average time to complete the survey was 7.31 Min. The results below are in order of the questions asked. Since the questions were not required, some respondents choose to not answer some questions.

All raw data for this survey can be found in the Appendix of this report. For questions that were not open-ended, the results are displayed in graphs and charts. For questions that were open-ended, the results were analyzed for trends and key takeaways.

Question 1: How often do you frequent Bldogett Open Space?

✓ The biggest frequency of visitors is split between those who visit a few times a week and those who visit a few times a month.

Question 2: If you answered never visited, tell us what has kept you from visiting Blodgett Open Space.

About the Results

14 people responded to this question out of 275 total survey responses.

Specific Trends in Individual Responses

Based on the answers given, we can identify some reasons for respondents stating that they have never visited Blodgett Open Space:

- 1. Distance: Some individuals mentioned that the distance is a factor that has kept them from visiting Blodgett Open Space.
- 2. No Class 1 e-bikes: One respondent noted that the restriction on Class 1 e-bikes might be a deterrent.

- Perception of Unfriendly Terrain for Mountain Biking: One person who used to hike in the area in the past expressed concerns that the trail system might not be friendly for mountain biking and might not offer suitable terrain for the activity.
- 4. Lack of Knowledge or Awareness: Several respondents stated that they were not aware of Blodgett Open Space until recently or didn't know it existed.
- 5. **Private Property:** One person mentioned that they heard it was private property, which might have deterred them from visiting.
- 6. Lack of Paragliding Launch/Landing: Two respondents, who seem to be paragliders, noted that the absence of a paragliding launch/landing site might be a reason for not visiting.
- 7. Limited Mountain Biking Trails: One individual felt that there were not enough fun mountain biking trails at Blodgett Open Space.
- 8. Perception of Not Worth the Drive: Another respondent stated that they didn't think it was worth the drive across town to visit.

Overall Takeaway

Overall, the reasons for not visiting Blodgett Open Space seem to revolve around factors such as distance, lack of awareness or knowledge about the location, perceived restrictions, or limitations on activities like mountain biking and paragliding, and concerns about the suitability of terrain for certain activities.

Question 3: What do you love about Blodgett Open Space?

About the Results

254 people responded to this question out of 275 total survey responses.

Specific Trends in Individual Responses

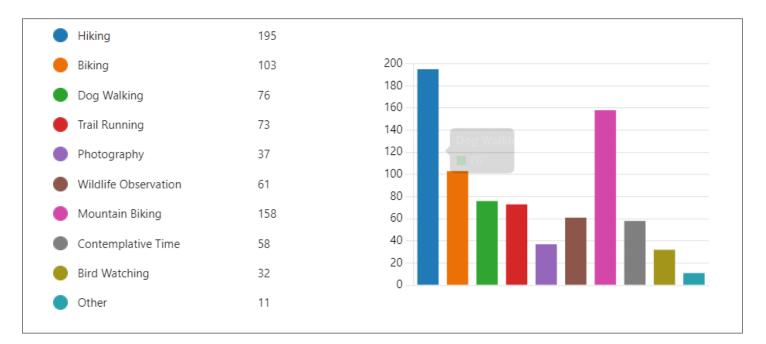

From these answers, we can identify several aspects that respondents love about Blodgett Open Space:

- **1. Views:** Many individuals appreciate the scenic views that Blodgett Open Space offers, including views of the city, mountains, and surrounding natural beauty.
- Trail Variety: Respondents enjoy the variety of trails available, such as those suitable for hiking, mountain biking, and trail running, offering different terrains and difficulty levels.

- **3.** Natural and Peaceful Setting: The natural and quiet environment of Blodgett Open Space is highly valued by visitors who seek solitude and a sense of being in the wilderness.
- 4. **Proximity to Home:** The park's location close to residential neighborhoods is a positive aspect, providing easy access to nature without having to travel far.
- 5. Access to USFS Land and National Forest: The ability to connect to U.S. Forest Service land and access extended adventures in Pike National Forest is appreciated by many.
- 6. Mountain Biking Trails: Blodgett Open Space's mountain biking trails, particularly the "Fenceline" trail, are highlighted as enjoyable features by some respondents.
- 7. Less Crowded: The fact that Blodgett Open Space is often less crowded than other parks in the area is seen as a positive aspect, contributing to a more peaceful experience.
- 8. Steep and Challenging Terrain: The presence of steep and challenging trails appeals to outdoor enthusiasts seeking physically demanding activities.
- 9. Natural and Untouched Landscape: Respondents appreciate the natural beauty and the preservation of the park's landscape, as well as the absence of excessive development.
- **10.** Biking and Hiking Opportunities: The availability of biking and hiking trails that provide exercise opportunities and connections with nature is well-liked by visitors.
- 11. Wildlife: Some respondents enjoy encountering wildlife while exploring the open space.
- **12.** Potential for Improvement: A few individuals express excitement about the potential for Blodgett Open Space, hoping for enhancements like paragliding launch/landing areas and additional trails.

Overall Takeaway

Overall, Blodgett Open Space appears to be favored for its natural setting, varied trails, beautiful views, and opportunities for outdoor activities like hiking and mountain biking. The location's proximity to residential areas, combined with the relatively tranquil and less crowded atmosphere, makes it a cherished resource for many visitors.

Question 4: What types of activities do you enjoy at Blodgett Open Space? Select all that apply.

✓ The two activities that people enjoy the most at Blodgett is hiking and mountain biking by an overwhelming majority as the standout activities taking place in the open space park.

Question 5: What excites you about Blodgett Open Space master and management plan update?

About the Results

244 people answered this question out of 275 total survey responses.

Specific Trends in Individual Responses

Based on the data, here are the key points and themes that have emerged regarding what excites people about the Blodgett Open Space Master and Management Plan:

Overall Takeaway

Please note that the responses are diverse, and not everyone expressed excitement about the plan or shared specific preferences. Some of those concerns below highlight the need for thoughtful and balanced planning that considers the interests and needs of various user groups while preserving the natural beauty and integrity of the Blodgett Open Space. Some of the concerns that were pulled out of the data as the most expressed were:

- Preserving the Natural and Wild Character: While some respondents expressed excitement about the plan
 preserving the natural character, others were concerned that the plan might lead to changes that could
 compromise the wild and untouched aspects of the open space. They want to ensure that the development of new
 trails and facilities does not negatively impact the area's wilderness feel.
- 2. Trail Maintenance and Social Trails: Some respondents expressed concerns about the need for better trail maintenance and addressing social trails. They want to ensure that any new trails are well-built, and they hope that the plan will address the issue of unofficial or poorly made trails created by users, which can lead to environmental damage.
- 3. User Conflict and Trail Etiquette: A few respondents mentioned concerns about potential user conflicts, especially between mountain bikers and hikers. They want to see the implementation of directional trails and user-specific trails to minimize conflicts and ensure everyone's safety and enjoyment.
- 4. Potential for Overcrowding: Some respondents were worried that the plan's expansion of trails and improved access might lead to increased overcrowding in the area. They hope that the city will consider measures to manage and control the number of visitors to preserve the experience and minimize environmental impact.
- 5. Loss of Unique Features: A few respondents expressed concerns about the possibility of losing unique features or trails, like Fenceline Trail. They hope that the plan will incorporate and protect beloved existing trails while developing new ones.
- 6. Environmental Impact and Wildlife Protection: Some individuals expressed concerns about the potential environmental impact of increased trail development and usage. They want the plan to prioritize wildlife protection and ensure that trail construction is done in an environmentally responsible manner.
- 7. Impact on Quiet Enjoyment: A couple of respondents mentioned their concerns about the impact of the plan on quiet enjoyment of the open space. They hope that any new developments will not disrupt the peaceful and serene atmosphere of the area.
- Unknown or Unclear Plan Details: Several respondents mentioned that they were not fully aware of the plan's specifics or what is being proposed. They expressed the need for more information and transparency about the plan to fully understand its implications.

Question 6: What opportunities do you feel there are for Blodgett Open Space?

0 people answered this question out of 275 total survey responses.

Question 7: What concerns do you have about the property and/or the update effort?

About the Results

232 people responded to this question out of 275 total survey responses.

Specific Trends in Individual Responses

Based on the data, here are the key points and themes that have emerged regarding what concerns people about the Blodgett Open Space Master and Management Plan:

- 1. Worries about not all people in the area being on board with the plan and concerns about the city not being progressive enough.
- 2. Fear that mountain bike trails will be "dumbed down" or removed and the potential over-sanitization of existing trails like Fenceline Trail.
- 3. Concerns about the impact on the natural environment and wildlife rights, as well as erosion on steeply sloping land.
- 4. Requests for developing and maintaining sustainable, easily navigable routes to the summit of Blodgett Peak to avoid disorientation among hikers.
- 5. General opposition to recent updates blocking off long-existing trails with natural debris and the desire to preserve what's left of pine forests.
- 6. Concerns about safety liabilities, preserving space for recreation, and addressing nefarious activities in the South Blodgett parking lot.
- Pleas to preserve expert-level trails and maintain a variety of trail difficulty levels to accommodate different user bases.
- 8. Requests for mountain bike-only trails and worries about the exclusion of certain trail users from the plan.
- **9.** Worries about increased traffic, noise, garbage, and destruction in the area, particularly in residential neighborhoods.
- **10.** Concerns about potential conflicts between different user groups, such as mountain bikers and hikers, off-leash dogs, and overcrowding.

Overall Takeaway

The feedback from the community regarding the development of Blodgett Open Space reflects a diverse range of concerns and opinions. There are worries about ensuring that all residents are on board with the park's plan and that the city takes a progressive approach to development. Concerns are raised about potential over-sanitization of trails, particularly for mountain bikers, and the impact on the natural environment and wildlife. The preservation of expert-level trails,

accessibility to the summit of Blodgett Peak, and the overall safety and recreation in the area are also key considerations. Additionally, there are fears of conflicts between different user groups and the exclusion of certain trail users. Balancing these varied perspectives will be essential for creating a successful and inclusive park that respects the environment and meets the needs of the community.

Question 8: In prior visits to Blodgett Open Space, have you ever traveled to the top of the peak or beyond?

✓ 267 people responded to this qustion out of 275 total survey respones. 158 have been to the top.

Question 9: If you answered "yes", how often do you travel to the top of Blodgett Peak and beyond?

1-2 times per weekOnce is enough	1-3 times per month	6-8 times per year	1-5 times per year	Once every few years	
Frequency		100%	0	%	100%

✓ Those that have traveled to the top are split between two groups that travel to the top a few times per year and one every few years.

Question 10: Is there anything you would like to make sure is considered as this plan is developed?

About the Results

221 people responded to this question out of 275 total response questions.

Specific Trends in Individual Responses

Based on the responses, here are some top cited additional considerations to be considered:

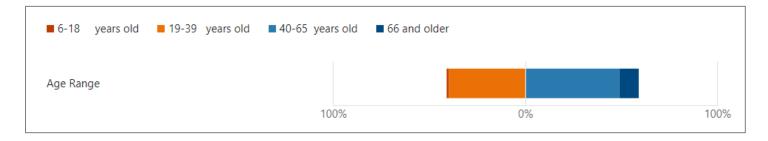

- **1. Paragliding and Hang Gliding:** Incorporate provisions for paragliding and hang gliding activities within the open space, ensuring designated launch and landing areas.
- 2. Land Control and Donations: Explore options for land exchange or donation with the USFS to expand city control over the land areas and enhance the open space.
- 3. Sustainable Trail Development: Prioritize the creation of sustainable trails that work with the natural features of the area to minimize erosion and maintain the challenging mountain-like experience.
- 4. Mountain Bike-Specific Trails: Consider developing mountain bike-specific trails that cater to different skill levels, including technical and challenging trails, jumps, drops, and flowy paths. Ensure a balanced approach with hiking-only and equestrian-only trails.
- 5. **Parking and Safety:** Address parking issues, especially during peak hours, and implement safety measures like closing parking lots in the evening, increased signage for rules enforcement, and better trail markings.
- 6. **Preserving Wildlife and Habitat:** Ensure that trail development and usage take into account the preservation of wildlife habitats and minimize disturbances to the ecosystem.
- 7. **Connectivity and Expansion:** Explore the possibility of creating trail connections to neighboring areas like Ormes Peak, Ute Valley, Pikeview Frontage, and other trail systems, creating a more extensive and interconnected network.
- 8. Summit Access: Improve and mark the trail to the summit of Blodgett Peak to make it more accessible and safer for hikers and reduce impacts on the ecosystem.
- **9.** Multi-Use and Directional Trails: Designate specific trails for different user groups, such as hiking-only and biking-only trails, and consider directional trails to reduce user conflicts.
- 10. Safety and Security: Implement measures to improve safety, especially in secluded areas like the south parking lot, including gates, patrols, and enforcement of rules.
- **11.** Paragliding Launch and Landing Site: Designate appropriate areas within the open space for paragliding launch and landing activities.
- **12. Limited Development:** Consider development that maintains the natural integrity of the area and does not lead to overdevelopment or overcrowding.

- Environmental Considerations: Take environmental impact into account when planning trail improvements, avoiding excessive trail grooming, and considering erosion control methods.
- 14. Connection to Pike National Forest: Explore opportunities to connect Blodgett Open Space to Pike National Forest trails, enhancing outdoor access and recreational opportunities.
- **15.** Adequate Signage and Facilities: Install proper signage for wayfinding, trail navigation, and user guidelines, and provide necessary facilities like trash cans and restrooms to improve user experience.

Overall Takeaway

Respondents to this question feel the development plan should strike a balance between different user needs and environmental preservation.

Question 11: What age range do you fall into?

✓ A majority of vistors fall between 19 – 65 years of age. Which indicates a multigenerational user group.

Question 12: Please enter your zip code.

80922 80	890918 904	80921	80909)923
80912 80906	80918	80919	80907 80905	80819
80831	80920	80903	80905	80915

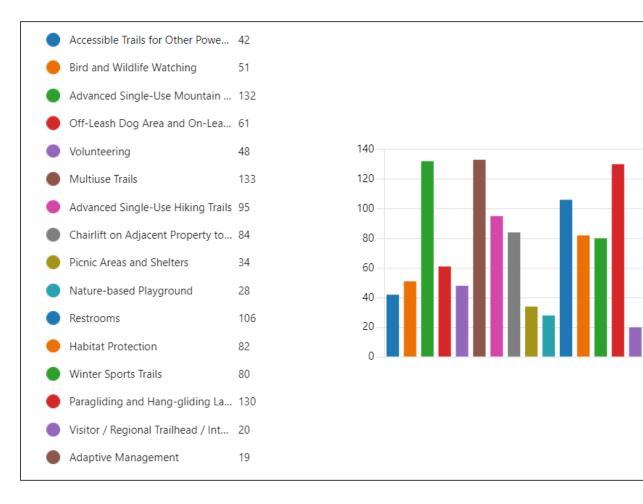

✓ 267 people answered this question out of the 275 responses that were received. The top three zip codes were:

- 141 fall into the 80919 zip code.
- 17 fall into the 80907 zip code
- 14 fall into the 80918 zip code.

2. Visual Preferences Survey Results

The project team prepared a digital visual survey that was the same as the dot voting boards prepared. A total of 229 survey responses were received. Below are the results.

Question 1: What features do you want to see in the Blodgett Open Space? Select your top five.

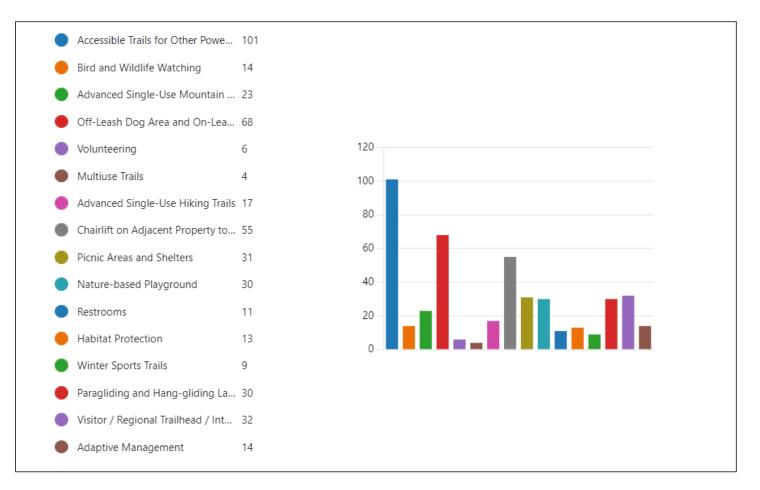

229 people responded to this question out of 229 total survey responses.

The top five YES answers were:

- 1. Multi-Use Trails (133 votes)
- 2. Advanced Single-Use Mountain Biking Trails (132 votes)
- 3. Paragliding and Hang-gliding Launch and Landing Sites (130 votes)
- 4. Restrooms (106 votes)
- 5. Advanced Single-Use Hiking trails (95 votes)

Question 2: What features do you NOT want to see in the Blodgett Open Space? Select your top five.

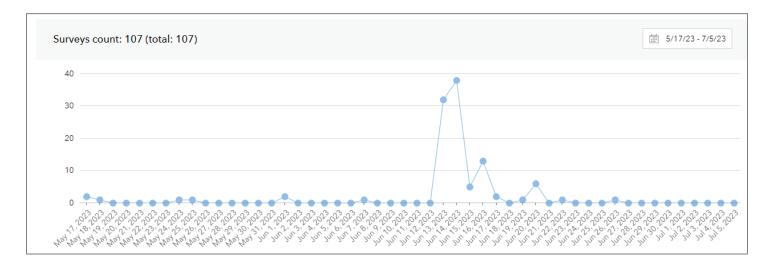

229 people responded to this question out of 229 total survey responses.

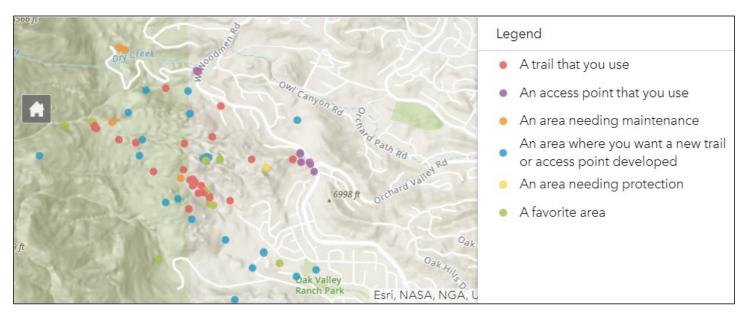

The top five NO answers were:

- 1. Accessible Trails and Other Power-Driven Mobility Vehicles (101 votes)
- 2. Off Leash Dog Area and On Leash Trails (68 votes)
- 3. Chairlift on Adjacent Property to Upper Elevations (55 votes)
- 4. Visitor/Regional Trailhead/Interpretive Center (32 votes)
- 5. Picnic Areas and Shelters (31 votes)

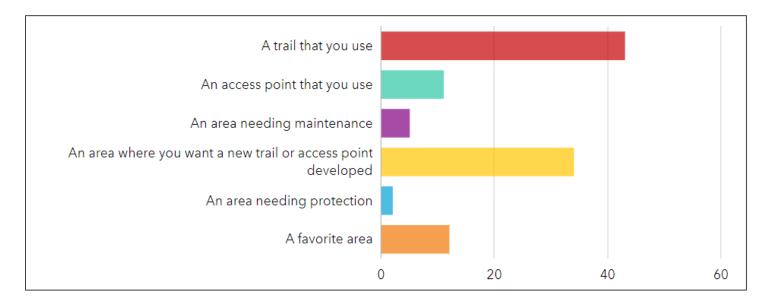

3. ARC GIS Survey123 Survey Results

This geo-based survey allowed respondents to answer questions about Blodgett Open Space and place comments on a map of the project limits to tell us specific feedback on areas of the park. The survey collected 107 responses, However, the results were spotty. Many participants only answered questions they felt like answering. Many were skipped (with an average of 95 people out of 107 skipping more than three questions in the survey). Some questions did not have enough data for a determination about the results and are not present for every question.

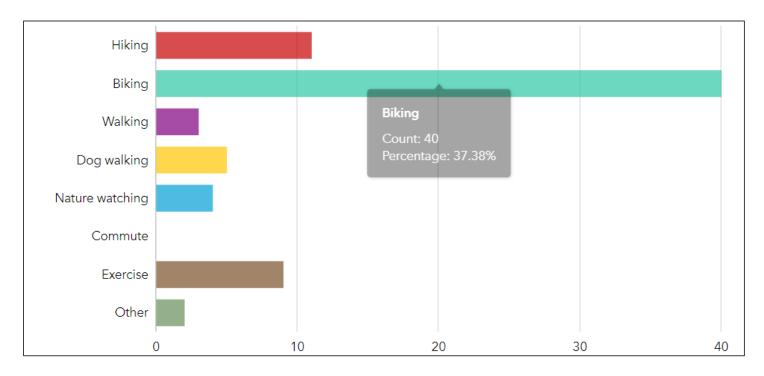

Question 1A Trail that you use: What type of data are you showing with this data point?

About the Results

107 respondents answered this question. The top two groups were 43 people that identified a trail that they use and 34 people that identified an area where they want a new trail or access point developed.

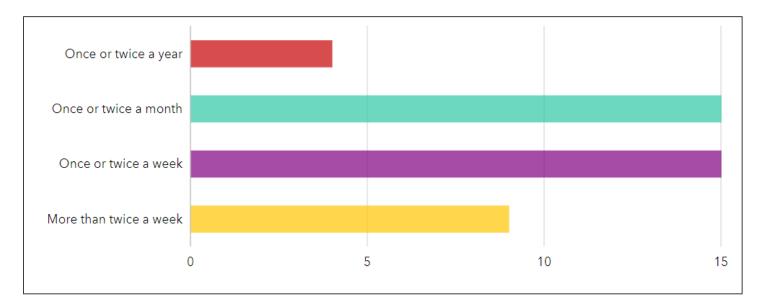

Question 1B Trail that you use: How do you use this trail?

About the Results

43 people answered this question. 64 skipped this question. Biking was the overwhelming majority of usage with 40 people stating this is how they use their trail.

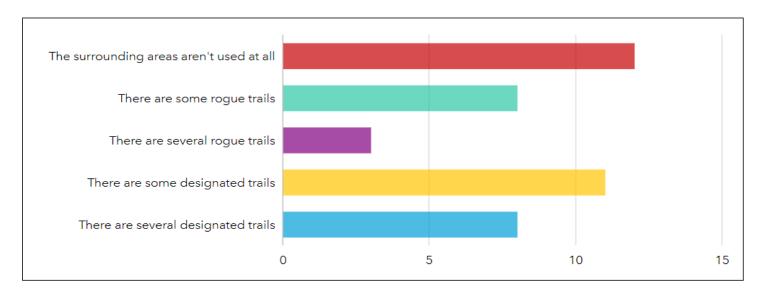

Question 1C Trail that you use: How often do you use this trail?

About the Results

43 people answered this question. 64 skipped this question. Most people use Blodgett Open Space frequently with two groups leading with visits weekly and monthly.

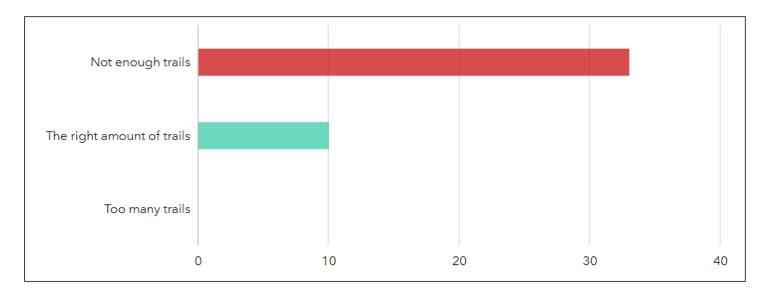

Question 1D Trail that you use: How would you describe the use of the areas surrounding this trail?

About the Results

42 people answered this question. 65 skipped this question. The two main answers note that areas surrounding this trail is not uses or there are some designated trails nearby.

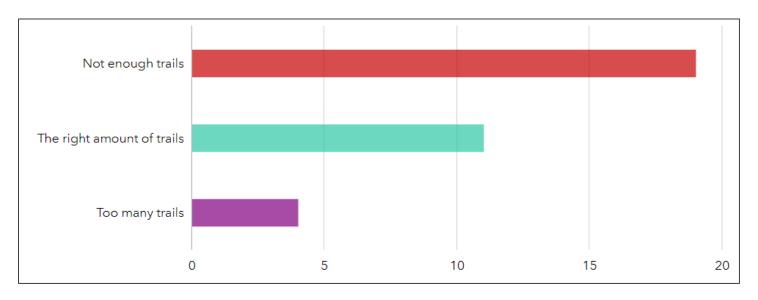

Question 1E Trail that you use: How would you rate the density of trails around and connecting to this trail?

About the Results

43 people answered this question. 64 skipped this question. Regarding Designated Trails: There are not too many trails in Blodgett and most think that there are not enough.

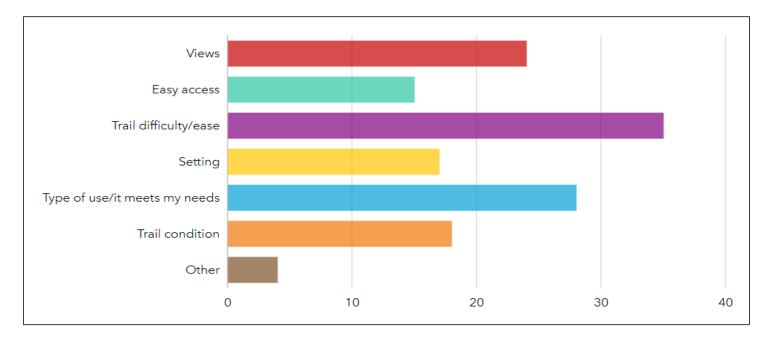

Question 1F Trail that you use: How would you rate the density of trails around and connecting to this trail?

About the Results

34 people answered this question. 73 skipped this question. Regarding Rogue Trails: Most feel that there are not enough trails.

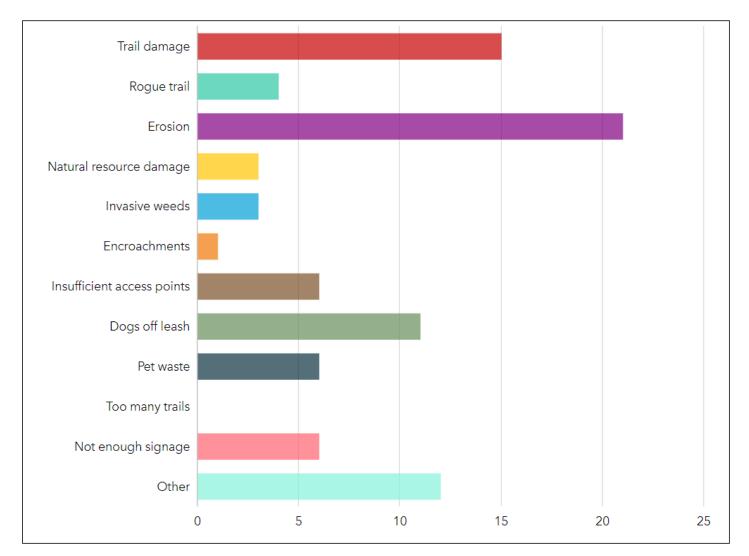

About the Results

42 people answered this question. 65 skipped. The top reason stated for why people like their selected trail was the challenge level with meets their needs and views coming in second.

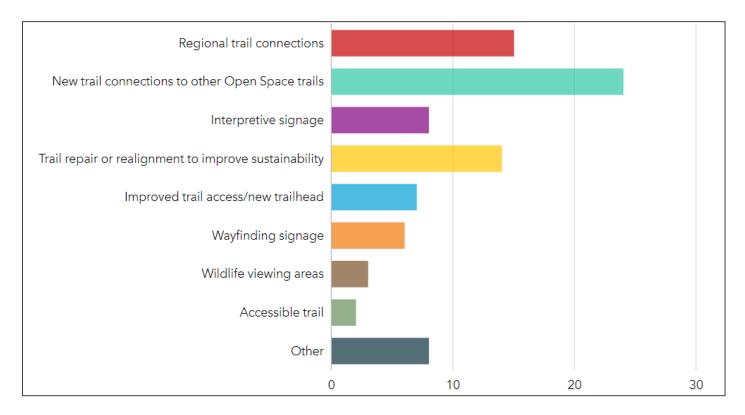

Question 1H Trail that you use: Which of the following issues have you encountered on this trail?

About the Results

42 people answered this question. 65 skipped. The biggest concerns are erosion, trail damage and other reasons that were not stated.

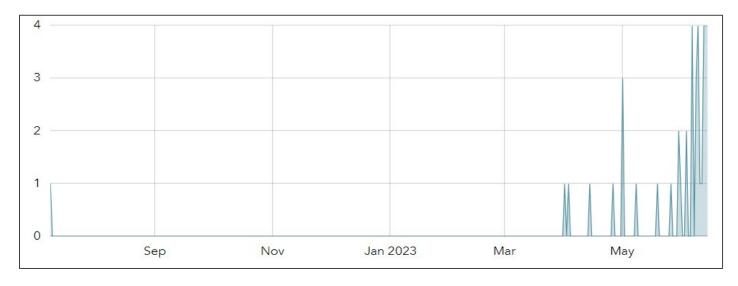

Question 11 Trail that you use: Which of the following opportunities do you foresee for this trail?

About the Results

42 people answered this question. 65 skipped. The biggest opportunities mentioned were new trail connections to other open space trails, regional trail connections, and trail repair or realignment to improve sustainability.

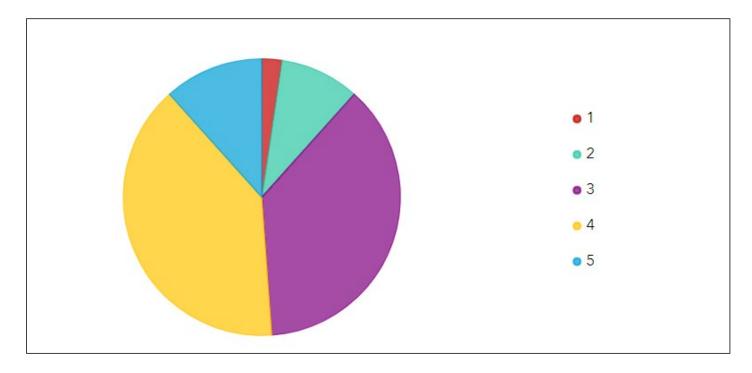

Question 1J Trail that you use: When was the last time you used this trail?

About the Results

41 people answered this question. 66 skipped. Most visit occurred within the last two months of this survey.

Question 1K Trail that you use: How would you rate the condition of this trail?

About the Results

43 people answered this question. With most people rating the condition of their trails between 3 and 4 on a scale of 1-5 with 1 being the best and 5 being the worst.

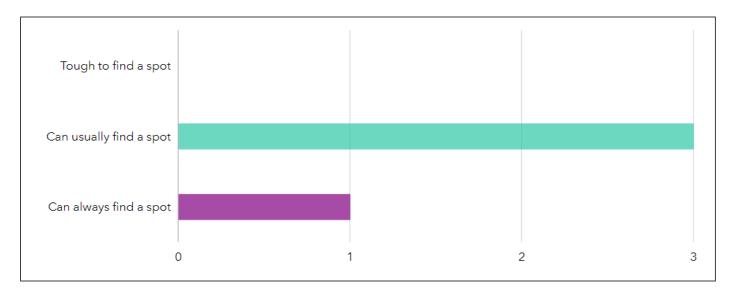

Question 1L Trail that you use: How do you typically get to this access point?

About the Results

Only 11 people answered this question. 96 Skipped.

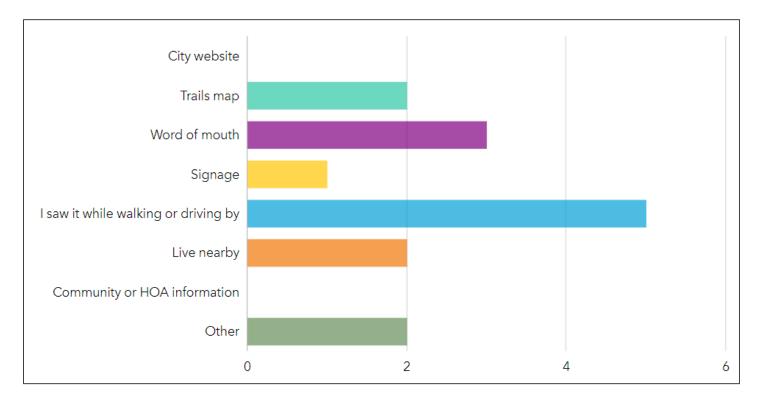

Question 1M Trail that you use: How would you rate the availability of parking?

About the Results

Only 4 people answered this question. 103 skipped.

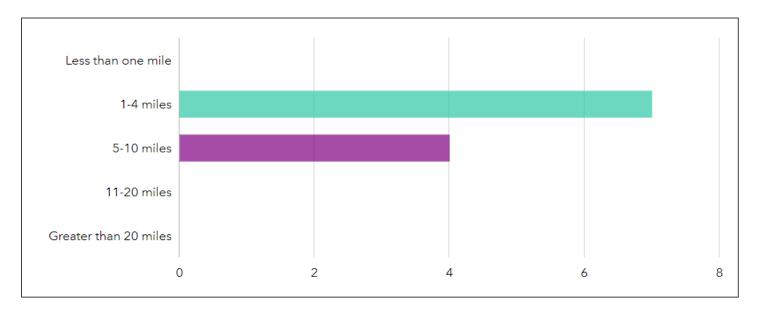

Question 1N Trail that you use: How did you find out about this access point?

About the Results

11 people answered this question. 96 skipped. Most cited they found it by walking or driving by.

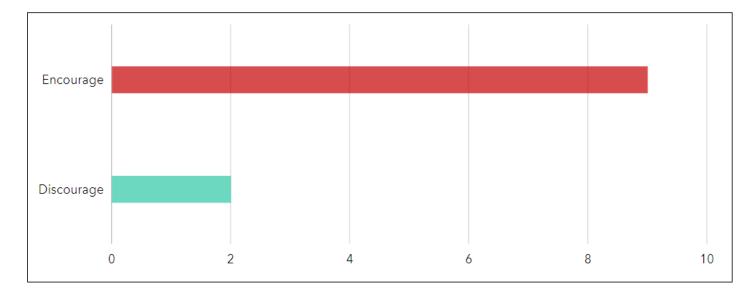

Question 10 Trail that you use: How far do you travel to get to this access point?

About the Results

11 people answered this question. 96 skipped. Most people visiting the park live within 10 miles of the open space.

Question 1P Trail that you use: Does this access point (location, condition, amenities) encourage or discourage your use of the Open Space?

About the Results

11 people answered this question. 96 skipped. Most cited it encourages them.

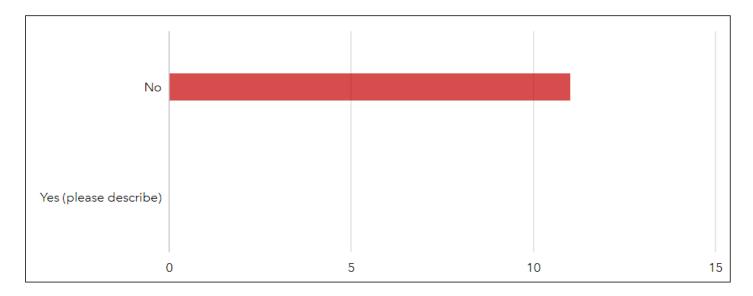

Question 1Q Trail that you use: Please describe why this access point encourages or discourages your use of the Open Space.

This was an open ended question. We received 10 response to this question.

About the Results

Overall, the community feedback highlights positive aspects of the park, such as its convenient location, accessible parking, and amenities like the port-o-john. However, there are concerns regarding the lack of clear signage, maps, and space utilization, which affects users' ability to explore and enjoy the area fully. Additionally, the restrictions on e-bike use have been mentioned as a potential issue. Overall, the park is appreciated as a good starting point for hikes and bike rides, but improvements in signage and accessibility could enhance the overall experience for all visitors.

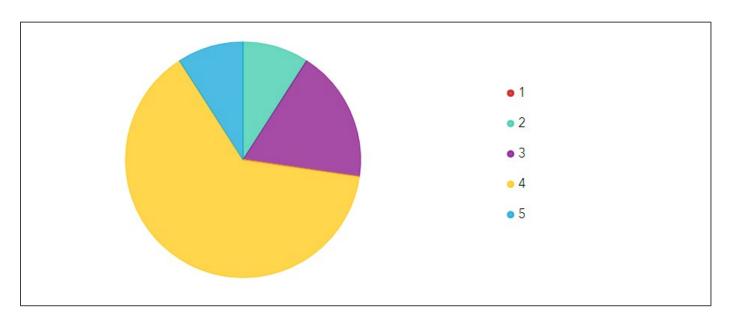

Question 1R Trail that you use: Would additional parking opportunities at this access point increase your use of the Open Space?

About the Results

11 people answered this question. 96 skipped. No one answered yes.

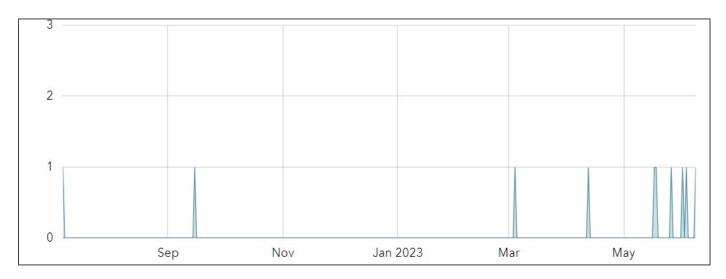

Question 1S Trail that you use: How would you rate the condition of this access point?

About the Results

11 people answered this question. 96 skipped. Most rated the condition of their access points at a 4. On a scale of 1 to 5 with 1 being the best and 5 being the worst.

Question 1T Trail that you use: When was the last time you used this access point?

About the Results

10 people answered this question. 97 skipped. Activity as far back as September but with most activity occurring within the last two months.

Question 2A Area Needing Maintenance: What type of maintenance is needed here?

Soft surface trail damage (ruts, erosion, etc.)		
Paved trail damage		
Sign damage		
Stormwater infrastructure		
Utility infrastructure		
Hazard (downed tree, wire fence, deeply incised trench, etc.)		
Trash/debris		
Other		
(0	2 4

About the Results

Only 5 people answered this question. 102 skipped.

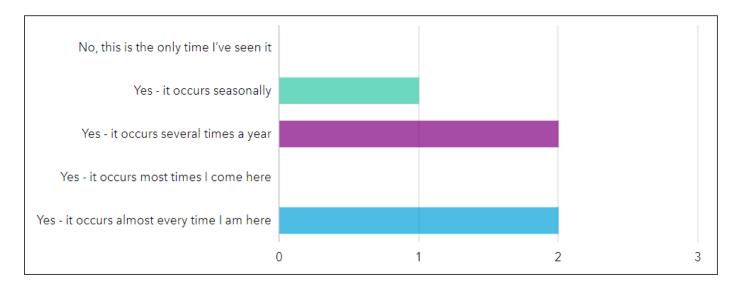

Question 2B Area Needing Maintenance: Please Describe the Issue or Damage.

This was an open-ended question. We received 5 responses to this question.

About the Results

- Trail is eroding with a rut running down the middle.
- Rutting and erosion on trail from ridge to water tower and continuing to trail split at entrance to trees. Reroute has
 formed by necessity but this part of trail has always been an issue.
- Really bad erosion all the way up the hill and also to the trail that goes up and around the water tank. I think it is a
 social trail but is heavily used and was already eroded badly. After the rain it is a deep v shaped ditch, very
 hazardous to hikers since its solid clay.
- From my memory I don't remember there being any signage towards the top of the route. Signs with trail names would help tremendously for new user's navigating this area.
- Fenceline needs the dedicated maintenance it deserves. It's a long standing favorite local trail and many trail user types enjoy it. I believe COSMBA has the best interests of this trail in mind versus any other trail building or maintenance organization and should be highly considered to carry out this ongoing maintenance work. This trail has been maintained by local hikers and bikers for ages and should continue to be a part of any new trails built in the newly acquired land areas surrounding it.

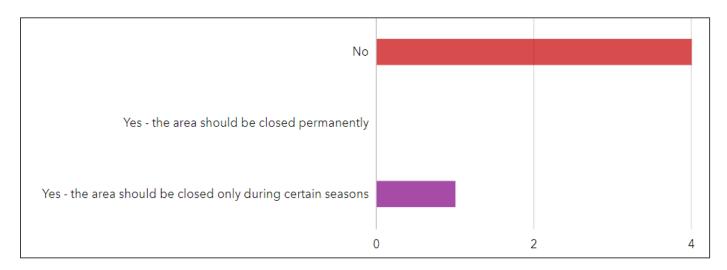

Question 2C Area Needing Maintenance: Is this a recurring issue?

About the Results

Only 5 people answered this question. 102 skipped.

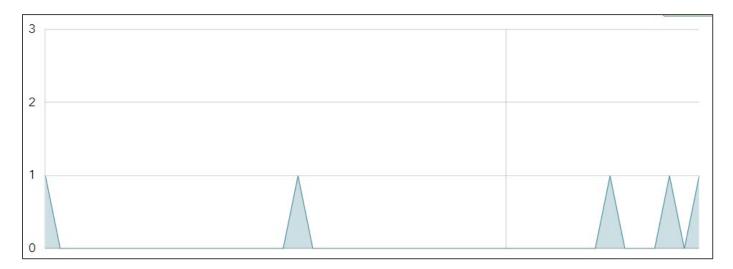

Question 2D Area Needing Maintenance: Do you feel this area should be closed as a result of this issue or to prevent this issue from occurring?

About the Results

Only 5 people answered this question. 102 skipped.

Question 2E Area Needing Maintenance: When did you last observe this issue?

About the Results

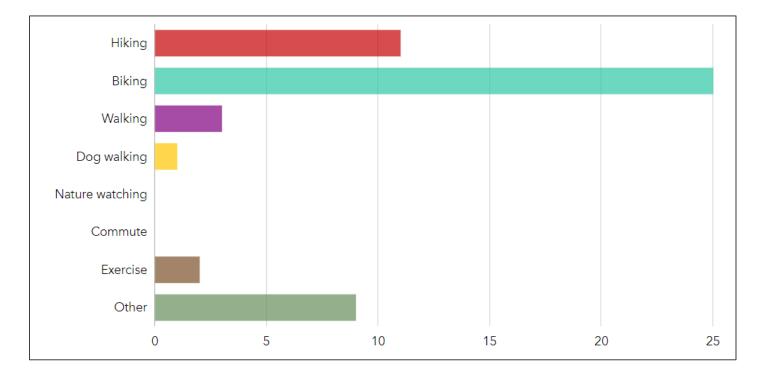

Only 5 people answered this question. 102 skipped.

Question 2F Area Needing Maintenance: If you have an image of this damage, please upload it here.

About the Results

There were no responses to this question.

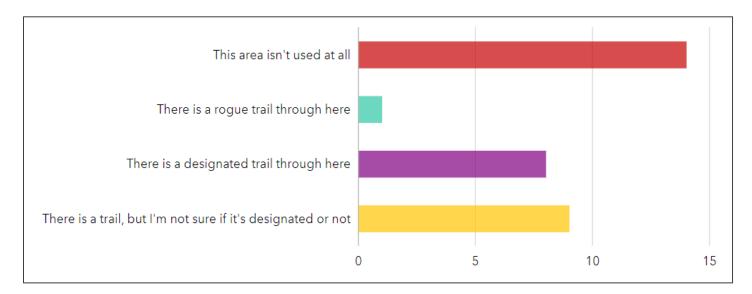

Question 3A Desired Trail: How would you like to use a trail in this area?

About the Results

34 people answered this question. 73 skipped. Biking and hiking were the top answers for desired trail use.

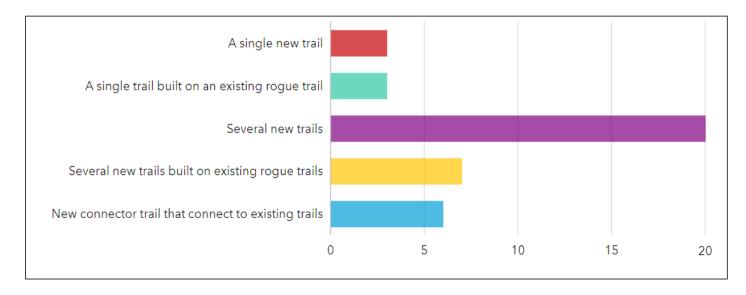

Question 3B Desired Trail: How is this area currently used?

About the Results

35 people answered this question. 75 skipped. There seems to be an opportunity for education with the second highest answer of users being unsure of trail designation.

Question 3C Desired Trail: What type of trail would you like developed here?

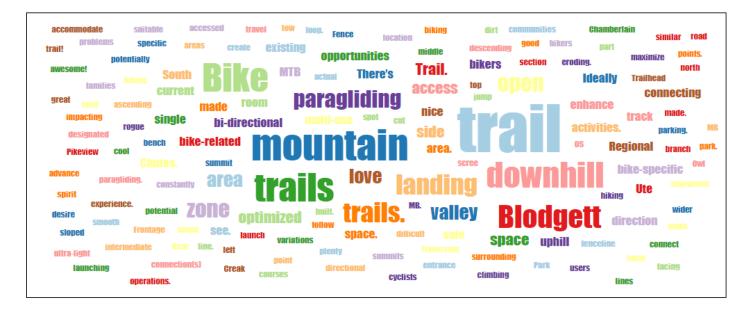

About the Results

27 people answered this question. 80 skipped. The top answer was several new trails.

Question 3D Desired Trail: Please describe the desired trail (access, destination, direction of travel, etc.):

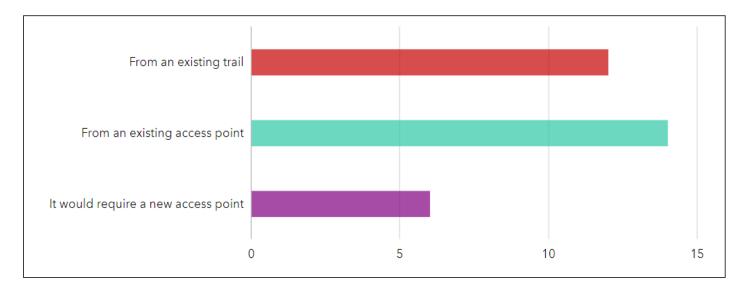

This was an open-ended question. Results are below with a word cloud showing the most mentioned words.

About the Results

Community members are keen on developing various types of trails in the Blodgett Open Space. There is significant interest in creating more mountain bike-optimized trails to enhance the area for bike-related activities. The desire for downhill mountain bike trails, bike-specific trails, and one-way trails for mountain biking is evident. Additionally, some respondents propose constructing a trail leading to the summit of Blodgett for easier navigation and to reduce erosion issues. Another popular idea is to establish new trail connections between different parts of the open space, ensuring better access for hikers and bikers alike. Several respondents also suggest making use of the location as a landing zone or launch point for paragliding, emphasizing the potential for recreational diversity. Overall, the community envisions a variety of well-designed and designated trails that cater to different activities and user preferences.

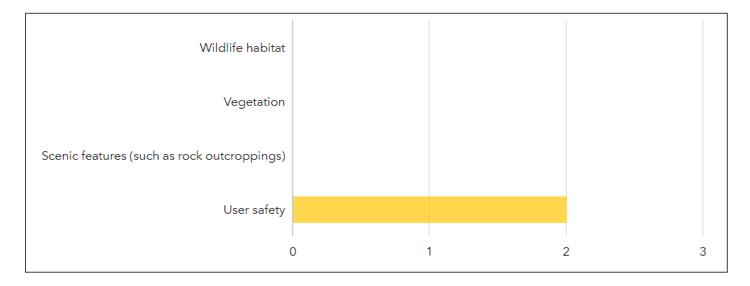

Question 3E Desired Trail: How would you access this trail?

About the Results

32 people answered this question. 75 skipped. The answers tell us most users access the trail from an existing trail or an existing access point.

Question 4A Area Needing Protection: Why should this area be protected?

About the Results

105 People skipped this question. Only two responded.

Question 4B Area Needing Protection: What types of wildlife use this area and need habitat protection?

About the Results

There were no responses to this question.

Question 4C Area Needing Protection: What types of vegetation grow here that need protection?

About the Results

There were no responses to this question.

Question 4D Area Needing Protection: Please provide any additional details or information on your concern about this area:

About the Results

Only two responses were received. Since that is not enough data to determine overall trends or feelings about any particular area, the two comments received are listed below:

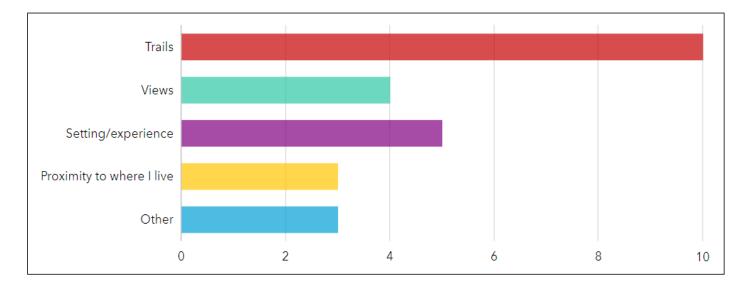

- Would like to see no trespassing signs and fence alerting trail users to private property beyond the trail.
- Please keep Fenceline trail.

Question 4E Area Needing Protection: If you have an image of this area and would like to share it, please upload it here

About the Results

There were no responses to this question.

Question 5A Favorite Area: Why is this your favorite Area?

About the Results

12 people answered this question. 95 skipped. The main reason is trails with user experience following.

Question 5B Favorite Area: Please describe what makes this area one of your favorite places.

This was an open-ended question.

About the Results

The community members express their appreciation for Blodgett Open Space as their favorite place, primarily because of the presence of excellent mountain biking opportunities. They value the availability of directional mountain bike trails, which they believe would enhance the overall experience for all users and contribute to an improved quality of life. Specific mentions are made about the highly regarded Fenceline Trail, praised as one of the best downhill mountain bike trails in the area. The accessibility of Blodgett Open Space, its proximity to home, and the access it provides to the national forest are also highlighted as favorable aspects. Overall, the community relishes the sense of being in the mountains, the thrill of downhill biking, and the potential benefits of having designated mountain bike trails in the park.

Summary of Other Input Received via the Project Team

Below is a summary of the emails received by the project team that were not via the project email, website, or any of the public input opportunities.

- Crime and Safety Concerns: Several respondents mentioned concerns about crime, late-night parties in parking lots, and issues related to alcohol/drug usage, noise, and criminal activity in existing parking lots. Safety concerns were also raised regarding traffic impact on neighborhood streets and potential hazards of bikers and pedestrians sharing the same trails.
- 2. Parking Issues: The text highlighted various parking-related concerns, including the opposition to having a parking lot near residential areas (e.g., top of Coldwater Dr. or along Allegheny). Instead, respondents favored expanding the existing South BOS parking lot or creating a new one close to the quarry office building and scale. Monitoring and controlling issues like trash and criminal activities in parking areas were also mentioned.
- 3. Trail Management and Usage: Several concerns revolved around trail usage and management. Some residents desired designated trails exclusively for hikers to ensure safety and avoid potential collisions with bikers descending at high speeds. There were complaints about rogue trail building and the cutting of vegetation, leading to erosion. Additionally, issues related to dogs off-leash, dog waste, and illegal activities like hunting and motorized vehicles on trails were brought up.
- 4. Environmental and Flood Mitigation Concerns: Respondents expressed concerns about maintaining natural drainage areas and not placing trails or recreational structures in these areas. There was a desire for flood mitigation measures in specific areas, especially after rainwater runoff incidents. Controlling noxious weeds was also mentioned.

- 5. Impact on Views and Noise: Residents were concerned about potential impacts on their views and tranquility due to new development. They wanted to avoid looking at nearby parking lots and having trail access points encroaching on their common spaces. Noise concerns from a new open space and the need for compliance with noise regulations were mentioned.
- 6. Need for Clear Regulations: Respondents wanted clear regulations and enforcement to ensure that visitors adhere to rules, such as leash laws for dogs and picking up after pets, to protect the environment and maintain a pleasant experience for all users.
- 7. Desire for a Welcoming Park: Overall, respondents desired a park that can be enjoyed safely by everyone, including visitors and homeowners living near the open space. They highlighted the importance of careful planning, stakeholder involvement, and adherence to the desires and concerns of nearby homeowners.

Conclusion

The data gathered from respondents regarding Blodgett Open Space reveals valuable insights about the public's perceptions, preferences, and concerns related to the area. Blodgett Open Space is appreciated for its natural beauty, tranquility, and abundant wildlife, providing visitors with opportunities for various outdoor activities, including hiking, biking, and paragliding. Respondents mentioned that the open space allows them to escape urban life and experience the unique terrain it offers.

However, along with appreciation, there are concerns about the current use of Blodgett Open Space. The most common concerns include erosion and trail maintenance, conflicts between different user groups (such as hikers, bikers, and paragliders), off-leash dogs, fire safety, and potential impacts on wildlife. Overcrowding and increased traffic are additional worries, particularly with the potential development of a mountain bike park.

Regarding improvements, respondents expressed a desire for more sustainable trails, better signage, and access to the summit of Blodgett Peak with marked trails. There were varied opinions on the addition of a mountain bike park and a paragliding launch site. Some saw them as opportunities to enhance recreational options, while others raised concerns about safety, user conflicts, and potential negative effects on the environment and wildlife.

To enhance connectivity, respondents suggested creating new trails that connect Blodgett Open Space with neighboring trail systems, such as Ute Valley Park, Austin Bluffs Open Space, and the Pike National Forest. The emphasis was on providing diverse trail options for different user groups, including hikers, mountain bikers, and equestrians.

The data also revealed that respondents' frequency of visits to Blodgett Open Space varied, with the most common being "1-3 times per month" and "1-2 times per week." Some respondents visited the area daily, while others mentioned visiting "1-5 times per year." A few respondents expressed interest in visiting more frequently, with frequencies mentioned as "6-8 times per year." However, there were also some who stated that they had never visited the open space.

In conclusion, the data reflects the community's strong connection to Blodgett Open Space and its appreciation for the natural amenities it provides. However, there are valid concerns that need to be addressed, such as trail maintenance and user conflicts. As the area's popularity increases, thoughtful planning and stakeholder involvement will be crucial in preserving its ecological integrity while accommodating the diverse interests of visitors.

Blodgett Open Space Master and Management Plan

About the Project

A master and management plan process is underway to enhance and protect Blodgett Open Space. The 384-acre Blodgett Open Space (Project Study Area - 700AC) is in the foothills of the Front Range and consists of trails and wildlife habitat neighboring the Pikes National Forest.

Using community input to be collected through an extensive community engagement process, the final master and management plan will effectively strike a balance between the need to protect and maintain the Open Space's ecologic and natural resource integrity with the need to serve the ever-expanding base of current and future users.

As part of the process, the Parks, Recreation & Cultural Services Department will work closely with the community to identify and prioritize how to improve, program, and manage this land to best meet the needs of Colorado Springs residents both now and in the future.

Background

The original Blodgett Open Space land was purchased through the City of Colorado Springs Trails, Open Space and Parks (TOPS) program and funding in March 2001. A second acquisition to the southeast was incorporated in 2018, bringing in a second parking lot and trail access location. Most recently in 2021, additional land was acquired to extend the land further south, with boundaries along the Pikeview Quarry and Allegheny Road.

> For more information on the background, please visit coloradosprings.gov/blodgett.

Blodgett Open Space Master and Management Plan

Project Goals and Objectives

- Expand Blodgett Open Space's foothills to mountain experience with opportunities to enjoy diverse ecosystems, multiple watersheds, rejuvenating burn areas, diverse recreational opportunities, access to regional trails, and connections to recreation adventures in the adjacent Pike National Forest.
- Identify problems and develop remedies that will protect the open space and the visitor experience.
- Protect the open space's cultural integrity and restore its natural resources, making it possible to encourage continued enjoyment while sustaining the open space for future generations.
- Create a trail system integrating equitable access for visitors.
- Take an integrated approach to protecting and planning for the future of this open space, as well as the adjacent City designated open space properties, Establish a shared vision with adjacent land managers to consider the larger landscape conditions.
- Provide engagement opportunities fostering a community-wide culture of stewardship and ownership for Blodgett Open Space.

*Check the public engagement opportunities tab on the project website for more details.

Blodgett Open Space Master and Management Plan

GIVENS

The givens identify those elements of the Master and Management Plans that are not negotiable. They represent the responsibilities of the Parks, Recreation and Cultural Services Department and provide the parameters for the decisions that will be made through the Blodgett Open Space master planning process.

- The properties will be collectively named and managed as Blodgett Open Space. The Slattery Acquisition, Pikeview Frontage, and westernmost segment of the Peregrine Open Space properties are collectively within the Blodgett Open Space. The other uniquely acquired properties will remain named and signed Peregrine Open Space, Oak Valley Open Space, and Woodmen Valley Open Space for the purposes of this master plan.
- The City's Parks, Recreation and Cultural Services Department is legally responsible for design, maintenance, operations, and management of all resources for Blodgett Open Space.
 - The Master and Management Plan must conform to provisions in the Trails, Open Space and Parks Regulations Ordinances.
 - The Plan must honor conservation easements and utility easements currently in place.
 - The City Parks Department's stewardship and recreation decisions will be based on collected data, changing conditions, and industry best management practices.
- All decisions regarding USFS lands are under the jurisdiction of the U.S. Forest Service. The USFS lands interlocking property boundary and parts of their property including Blodgett Peak will be considered during this planning process.
- Decisions regarding sensitive and federally protected wildlife management, habitat and protection will be made with guidance from Colorado Parks and Wildlife (CPW).
- Many groups and individuals are interested in and encouraged to help develop the best possible Master and Management Plans; all voices will be equal in the decision-making process.
- Implementation of the Blodgett Open Space Master and Management Plan will occur as funding allows.
- The recommended Master and Management Plan will be submitted to the TOPS Working Committee for recommendation and to the Parks and Recreation Advisory Board for approval.

Engage

The initial surveys for this project are now closed.

Stay Informed

Please join the community as we engage in a public planning process to imagine the future of Blodgett Open Space. This planning process seeks to develop a set of recommendations that reflects the vision of the community while simultaneously considering new opportunities for outdoor recreation, access, safety, watershed protection, restoration, conservation, and trail connectivity.

To be kept informed of project progress and upcoming public engagement opportunities, sign up to be added to the email list.

Most recently in 2021, additional land was acquired to extend the land further south, with boundaries along the Pikeview Quarry and Allegheny Road.

Tapis Associates is leading the Planning process in collaboration with the Parks, Recreation and Cultural Services staff and the public. This Tapis Team brings an unmatched history of working collaboratively with the City of Colorado Springs and its residents to create master and management plans. Those plans have helped to instill a proud tradition of stewardship of Colorado Springs' parks and open spaces. Our team members, TAPIS Associates, Chickenango Marketing Strategies, ERO Resources, Chinook LA, and Wilson & Company, have combined experience and expertise in trails planning, open space planning and management, resource protection and environmental analysis, stormwater/water quality, public process, park interpretation and project management.

These disciplines, combined with the commitment and engagement of community residents, will ensure a process the creates stronger connections between people and this place, and a sustainable plan that future generations will continue to enjoy and experience the unique ecosystems, environments, and recreational experiences that Blodgett Open Space has to offer.

For more information on the background, please visit the Blodgett Open Space page.

PUBLIC ENGAGEMENT OPPORTUNITIES

ABOUT

FUNDING

The Tapis Team's collaborative, interdisciplinary approach integrates gathering input from stakeholders and the community throughout the planning process from existing conditions through the final plan. The community planning process

- Utilizes traditional and innovative technologies and tools that appeal to and engage diverse populations
- Is open and transparent to all who are interested in Blodgett Open Space, the ecosystem and wildlife preservation, the Chamberlain Trail, the Park-to-Peak Connector, the future bike park, and other regional/neighborhood issues and connections
- Is convenient and comfortable for all participants
- Combines and considers both technical analysis and the "lived experiences" of people who care about the open space
 properties
- Builds relationships of trust between the City and process participants and among participants themselves
- Develops public judgment by providing factual information as well as multiple opportunities for people to hear directly from each other
- Is supported by a rigorous community outreach program to promote and document the process

To see upcoming events, go to the Public Engagement Opportunities tab.

We actively sought citywide input for the open space master and management plan during the spring and beginning of summer. The initial project surveys are now closed. More input opportunities and information regarding future activities will be added to this list as they become available.

Schedule for Upcoming Public Input Opportunities

Dates are being planned for the next phase of the project starting in late August. Check back for more details as events become finalized.

program. Implementation of a future adopted master and management will occur as funding allows.

						I'm concerned conflicting desires will ruin the area. The desire to protect the natural and wild						
						aspect of the Blodgett area neither aligns with the desire to place an adjacent bike park nor pairs nicely with the recent trend of scouring buildozer gashes across most open spaces and calling						
						them "trails".						
						Since the trailhead on Centennial was put in, the West Woodmen Trail and Fence Line trail have						
						become busy with bike traffic. The downhill traffic on Fence Line is reckless and dangerous it						
						is the new Captain Jacks (however "illegal", this line is undeniably great for hiking). Social trails built by the bikes have sprung up and the area (I've even encountered bikers dropping in from						
						Ormes and coming down Dry Creek) has become a hazard to walkers. Additionally, the trailhead for West Woodmen has created a haven for loitering teens, the same problem the Blodgett						
						trailhead has dealt with. I remember when the home owners across the street were told the						
						trailhead at the top of Centennial wouldn't bring in the kind of problems it has.						
						The installation of a bike park, instead of restoring the quarry to a natural state, will flood the			- Preserve the wildness and quiet of the Oak Valley and			
						neighborhood and trails with activity. Oak Valley Ranch Park will become the overnight car camping spot for those using the park, which will also bring recreational drug use to the park			Blodgett areas — choose the natural state over the money making one. The bike park will be worse for the wildlife than			
						which is currently a quiet nook for small children and families. This will destroy the village-like			a random hiker fit enough to make it to ridgeline.			
		Blodgett Open Space is a wild and quiet		While the route up Blodgett can be fun and challenging, it is also confusing. I'm hoping a		dynamic of Oak Valley Ranch.			 Do build trails like the Dixon trail. Don't scrape trails into wide scars a stroller can traverse. Rocks and roots are part of 			
		corner of Colorado Springs. For those		tactful route up the peak can be designed		The trails in the area will become overrun by the biking lobby and only those strictly policed in			the aesthetic and the pleasure of hiking.			
		who are willing to work hard, the solitude and views are a fantastic		something philosophically appropriate like the Dixon Trail in Chevenne Mountain State Park.		Blodgett will remain safe for hikers.			 Do solve the challenge in such a way the children and families playing at Oak Valley Ranch park aren't suddenly 			
		reward. There is also interesting wildlife		NOT like the Barr Trail. For the record, the illegal		So my concern is greed for money and resume accomplishments will win out over making trails			dealing with loiterers			
		and trails which are actually challenging — a nice change from standard urban	Running;Wildlife Observation:Photography Conte	trail from Dry Creek to the upper third of Blodgett is significantly better than the Blodgett		wild, quiet, and sustainable. I fully expect the biking lobby to utterly ruin the area, the trails to be scraped into wide swaths devoid of terrain challenges, Oak Valley to be diminished by busyness,			 Do make the area an on foot haven, not a biking one. Colorado Sorings has plenty of great biking and we don't 			
11 5/1/23 10:35:22	2 5/1/23 11:00:44 1-2 times per week	trails.	mplative Time;	"trail".		and all wild routes up high (apart from one route up Blodgett) to be blocked off.	Yes	1-3 times per month	need another Captain Jacks.	40-65 years old	80919	

						The South Blodgett parking lot has become a significant issue. Two weeks ago, my wife encountered a deceased individual. Today, there was a homeless man resting in his vehicle.						
						possibly for the entire night. The location has turned into a gathering spot for individuals smoking marijuana, and litter is abundant.					1	
						Last week. I witnessed a man arrive, release his dog from the car without a leash, and the dog						
						proceeded to defecate. The dog then reentered the vehicle, and the man departed without addressing the mess. Although this may not appear serious, it contributes to the area's						
				Hiking;Biking;Dog Walking;Trail		deterioration.			Hove the space, we just need to make sure we can keep			
				Running;Photography;Wildlife Observation;Mountain		The parking lot is situated in such a hidden location that monitoring the activities occurring there is difficult, yet it has become a major concern for the neighborhood. As residents living close to			people accountable to keeping it clean/safe. My fear is someone's going to get careless and burn down the area (like

							_	An increase in traffic, parked cars, and people coming into the area that do not live in the area. The current Blodgett Open Space and parking at Blodgett Peak and Blodgett South have brought						
								a lot of undesirable activity after hours and throughout the night. The police force is not staffed						
								to patrol and monitor the existing areas so adding other areas inviting the public in seems dangerous for the local community. Safety to the surrounding neighborhoods needs to be part of						
							_	the plan. Increased police presence needs to be part of the plan. Based on the current problems, expanding the open space seems to be ill-conceived. Currently this is a safe area to live in and						
							_	walk around day and night. That will change if expansion occurs. Police presence must be						
								funded and staffed, but creating and environment that requires police presence seems like a bad idea. Look closely at the problems that already exist in the Biodgett Open Space. Another			Safety for the community. Increased police and fire support and activity. Closed, gated parking areas during park closure			
								concern is increased fire danger in the areain a community that has already suffered from fire			times. Understand the gates are not closed if cars are still in			
				It is my neighborhood. I love that it has remained undeveloped and I enjoy our			_	evacuation during Waldo Canyon. People hike in the Blodgett Open Space and start open fires, use propane camping equipment, and start fires (Fire on Blodgett Peak summer 2022 for			the lot which mean the park closing times are not enforced. Open parking areas invites off hours activity which it			
				variety of wildlife. I would hate to see		The master plan must support the nature that		example). It creates a danger and will require increased fire patrols and response. Again, look at	Tried but did		definitely NOT good for the community. Do NOT create a

Trail is eroding with a rut running down the middle	1
Rutting and erosion on trail from ridge to water tower and continuing to trail split at entrance to trees. Reroute has formed by necessity but this part of trail has always been an issue.	1
Really bad erosion all the way up the hill and also to the trail that goes up and around the water tank. I think it is a social trail but is heavily used and was already eroded badly. After the rain it is a deep v sh aped ditch, very hazardous to hikers since its solid clay.	1
From my memory I don't remember there being any signage towards the top of the route. Signs with tr ail names would help tremendously for new user's navigating this area.	1
Fenceline needs the dedicated maintenance it deserves. It's a long standing favorite local trail and ma ny trail user types enjoy it. I believe COSMBA has the best interests of this trail in mind versus any oth er trail building or maintenance organization and should be highly considered to carry out this ongoing maintenance work. This trail has been maintained by local hikers and bikers for ages and should continue to be a part of any new trails built in the newly acquired land areas surrounding it.	1

I'm working to be there today. But if not,

So far what I am hearing from neighbors is:

- Crime and late night parties in the parking lots
- Need great hiking trails
- Bicyclists building trails behind backyards is a nuisance.

From: Date: Tue, May 23,	message 2023 at 4:43 PM rom a neighbor on Front Royal Drive

Here below are a few concerns from a longtime neighbor in our HOA about the new BOS property usage. They asked to remain anonymous. Live on Front Royal Drive, not far above Allegheny, back to the new Pikeview Frontage.

Ron

We have a few concerns about the new open space at the former quarry area.

1. We don't want everyone using Allegheny as a **parking** space, or if they have to, please have them park farther South away from our neighborhood.

2. We don't want a bunch of **lights and noise** from the new Open Space. We also have a concern with all the **dust**. Do they have a plan to control the dust? I hope they will have **hours and use the current gate** to shut down the open space each evening.

Thank You,

	& Desires for new BOS from Live Oak Station Filing #2 HOA
Го:	

It was great to meet both of you at the community meeting on May 20th!

Chis and I realized there are seemingly many pieces of information coming your way from many sources for shaping what the new BOS might look like.

Thus, as nearby neighbors, we have **compiled one document**, to help represent the **Concerns and Desires** of many of our residents in our **Live Oak Station Filing #2 HOA**. See attached Word document.

Thank you so much,

1

CONCERNS and DESIRES for the new BOS – from Live Oak Station Filing #2 HOA

Introduction:

Our HOA is made up of **75 homes** – located on **these streets**:

- Coldwater Drive
- Front Royal Drive (above Allegheny)
- Vidalia Terrace
- Hollandale Drive (except for the top part)
- Natchez Place

All of these streets are close to the Pikeview Frontage area, with thirteen (13) homes on Coldwater and Front Royal directly backing up / sharing a boundary with BOS Pikeview Frontage area. Some homes are fairly close to the upper part of the new BOS land above Hollandale. Thus in a real way, we are the "closest neighbors" to the new BOS land. Therefore we hope the BOS planning team will give considerable attention to the concerns and desires of us as nearby homeowners.

This document represents many of the desires and concerns of our 75 HOA residents, whom we have talked with. Ron Goerzen and Chris Dorry, representing our HOA to the BOS SAC, are the compilers of this document. We have attempted to be concise and specific in expressing our resident's concerns and desires, yet thorough at this point in the process. See the <u>SUMMARY</u> of main points at the end. Note: this document may be amended by us in the future as new desires or concerns arise; and as the BOS plans begin to take shape.

PARKING Location / Issues:

- This is probably the **#1 concern** our HOA residents have. None of us wish to have to stare at a nearby parking lot.
- We do **NOT** want any kind of a parking lot, nor access to it, at the top of Coldwater Dr (cul-de-sac). If it were to be placed there, it would unfortunately create a lot of **extra traffic** on many of our streets. And its close proximity would likely be problematic.
- We do **NOT** want a parking lot built right off of / along Allegheny (between the quarry entrance road and the intersection of Front Royal Dr and Allegheny).
- We **FAVOR** the ideas of expanding the existing South BOS parking lot, and possibly the building of a new parking lot at the end of the Quarry entrance road (close to the quarry office building and scale).
- We have been aware of **bothersome issues** in recent years at the existing North and South BOS parking lots (e.g., trash, alcohol / drug usage, noise, criminal activity, etc.). We desire that the City monitor and control these kind of issues at any new parking locations with **cameras and gates** being constructed to limit such activity, especially outside park-hours.

Existing Natural DRAINAGE area:

- There is a natural drainage area, coming down off the foothills, on the far Easterly side of the Pikeview Frontage (just immediately West of Coldwater Dr. and Front Royal Dr.)
- Our **DESIRE** is that this drainage area be **left intact** or improved, and that NO trails or other recreational structures be placed in this drainage area. If that were done, such trails would be harder to maintain, and could impede the natural drainage of water. In the past 20 to 25 years, water has flowed down this drainage area, including filling the catchment pond on several occasions after heavy rains.

Flood Mitigation and Weeds:

- Spraying and control of noxious weeds. The Quarry employees used to do that, which was appreciated.
- Flood control / mitigation above (North of) Coldwater Dr and Hollandale Dr (the upper part). After the Waldo fire, rainwater runoff gushed down the hills, spilling down the empty lot onto upper Hollandale Street, flooding one nearby house basement, and threatening others. It also came rushing down Coldwater. We desire that the City do flood mitigation and take responsibility for any future flooding in this area.
- Deeper channels are being caused by heavy downhill usage on Fenceline (and now other) trails (water can't escape & thus flows faster), and these trails haven't been 'improved', with the construction of "water turn-out bars" to direct water off the trail.

Shared BOUNDARY on Easterly side of Pikeview Frontage:

• Our homeowners, who directly back to the East side of the Pikeview Frontage area, have a strong desire that no trail of any kind be built / placed immediately behind their back lots. If that were done, it would literally be within a few feet of their property, due to the very narrow space between the boundary line and the drainage area. That would create undesirable noise, visibility issues, possible littering of trash, etc.

TRAILHEAD Location and Access:

- Currently there are about five (5) locations where the new BOS land or existing non-system trails can be accessed directly from our HOA-owned open / common spaces.
- We have concerns about the location of any new / permanent trailheads, or access points to the BOS.
 We do **NOT** want any of them placed where they would interfere with or be located on our HOA-owned common spaces or area. For example, we certainly do not desire general public recreational users walking or biking over our HOA common spaces to access the BOS land. A number of mountain bikers are already doing this on their descent.

Trail Usage:

- A number of our HOA residents have expressed a desire for **trails designated ONLY for HIKERS**. Each of these residents have complained of how dangerous it is to be walking or running on a trail that is also used by mountain bikers descending at a high speed. Many hikers have been very close to being run over by bikers, and bikers don't always yield the right of way to hikers as they are supposed to do.
- It's sensible to us that some trails would be ONLY for bikers; and other trails "multi-use" in nature.
- We are also very concerned by the **recent rampant "rogue" trail building** and cutting of vegetation / shrubs (most by bikers), and 'short-cutting' with little regard for resulting erosion.
- At times there have also been **undesirable or illegal issues** like: illegal hunting, homeless person using drugs and lighting campfires, trespassing, motorized vehicles (dirt bikes and ATV's), dumping of debris and garbage along Allegheny, drug-dealing, fireworks, and dogs off-leash and poop not picked up.

END-NOTES:

- The two compilers of this document, Ron and Chris, have hiked / run up into the BOS and USFS land a combined total of at least 5,000 times over the past twenty years. We thus know this area very well, and have first-hand knowledge of many of the issues above that we presented.
- We are indeed fortunate, along with our neighbors, to live so close to it. It is indeed a precious asset that we hope can be stewarded well.
- We hope bottom line, that the new BOS becomes a park that EVERYONE can enjoy and feels safe in, including visitors and homeowners that live next to this area.

SUMMARY OF MAIN POINTS ABOVE:

- 1. Parking: NO parking lot at or near the top of Coldwater Dr. Favor expanding South BOS parking lot, or building new parking lot at the top of the quarry entrance road (next to the quarry scale and office.)
- 2. Minimize traffic impact on our neighborhood streets.
- 3. Leave existing drainage areas intact on East edge of Pikeview Frontage.
- 4. City responsible for flood mitigation for any runoff coming down the foothills.
- 5. No trail directly behind / close to homeowner's lots on Coldwater Dr. and Front Royal Dr.
- 6. General public recreational users NOT walking or biking over our HOA common spaces to access the BOS land.
- 7. Desire some trails for HIKERS only.

Hi,

Just wanted to send a few thoughts.

- 1. Unless there is road access to a launch, hang gliding would be a much more challenging activity to conduct in Blodgett Open Space due to its characteristics. This is much more of a paragliding appropriate site. Hang gliding is also drastically declining and less likely to have participants.
- 2. All of our activity is unpowered and does NOT have noise associated with it. I think there may be some confusion about that.

Regards,

Tuesday, May 23, 2023 3:25 PM Fwd: Letter with concerns about new BOS, from Marti on Front Royal Drive
Follow up Completed
nessage 2023 at 3:06 PM concerns about new BOS, from Marti on Front Royal Drive er

It was a pleasure to meet both of you on Saturday at the community meeting! Thanks for organizing that, and time to talk.

Here below is a letter from Marti Farsje, a resident on Front Royal Drive (in our HOA), who backs right up against the newly acquired land. She is an avid walker, going out a couple of times a day. I thought she expressed herself well, and represents the concerns many of us hikers and nearby homeowners have.

Priscilla: this is the digital version of her hard copy letter that I gave you on the 20th, per your request.

See you at the SAC meeting on June 6th.

Sincerely,

Sent: Friday, May 19, 2023 6:15 PM

Subject: Re: May 20th meeting

Of course you can share. I want them to know my concerns! Feel free to use my name.

Sent from my iPad

Sent: Friday, May 19, 2023 3:03 PM

Subject: May 20th meeting

I apologize for my late response.

I bought my house strictly for the view and easy access to the trails behind me. I researched the property before I purchased it and was told it was going to be a bicycle park. I was on board as I support a recreation area for the kids to enjoy. These kids are athletes. I did not realize that it is destined to be the largest bike park in the area.

My concerns:

Parking for the expected number of visitors. I will be devastated if I'm staring at a parking lot while sitting in my back yard. There are plenty of hills where a parking lot could be hidden. I'm hoping that is the case.

Right now it is dangerous for both the bikers and the pedestrians to be sharing the same trails. The pedestrians can't hear the bikes coming behind them, the bikers are going too fast to stop. The bikers don't give the right away to pedestrians as they're supposed to. Everyone complains how close they have come to be run over. Hoping that two trails will be in place so both can enjoy. I've stopped going to Ute Valley Park because of the same problem. I don't enjoy my hikes there as they are interrupted constantly to let bikes through.

Who is going to insure that the rules are being followed. There are signs at the entry points of the trails. 1. Dogs must be on leash. I would say 70% of the dogs are off leash. 2. Must clean up after dogs. There's poop everywhere. This is bad for both flora and fauna and not appreciated by hikers.
3. Motorcycles are going up to the mine road at night and on Sundays when the mine is closed. There were beer cans scattered all over the Blodgett open space parking lot on Thursday morning this week. All of us are nervous about fire.

I guess the bottom line of this long winded email is that this becomes a park that EVERYONE enjoys and feels safe including <u>visitors</u> and <u>homeowners</u> that live next to the open space.
